Dr. Clark Thomborson has served as a Professor of Computer Science at the University of Auckland, New Zealand, since 1996. His prior academic positions were at the University of Minnesota, and at the University of California at Berkeley, with consultancies or temporary positions at the Massachusetts Institute of Technology (MIT), Microsoft Research (Redmond), InterTrust, IBM Yorktown, Institute for Technical Cybernetics (Slovakia), IBM Almaden, and Xerox PARC. He gained several years of commercial experience in the USA as a systems integrator at Digital Biometrics Inc (now Identix), LaserMaster Inc, and Nicolet Instrument Corp (now Thermo Electron). Under his birth name Clark Thompson, he was awarded a PhD in Computer Science from Carnegie-Mellon University, and a B.S. (honors) in Chemistry from Stanford University. He has published more than 80 refereed papers on topics in software security, computer systems performance analysis, VLSI algorithms, data compression, and connection networks.
