

“When I finished as a medical student,  
there was such a big gap  
between what we learnt and what we had to do as doctors.  
This wasn't the case with Health Informatics.  
There's a strong link between the classroom learning  
and what we do in practice.”

**MUHAMMAD MOUSA,**

POSTGRADUATE DIPLOMA IN HEALTH SCIENCE (HEALTH INFORMATICS)

“ “The business courses offered in the post graduate programme helped me to see why certain decisions are made by DHBs and managers in different departments of a hospital.” ”

**SANDRA OLDFIELD,**

POSTGRADUATE DIPLOMA IN HEALTH SCIENCE (HEALTH INFORMATICS)

“Real research.  
Real projects.  
Real IT.”

**MICHELLE SOAKELL,**  
POSTGRADUATE STUDENT (HEALTH INFORMATICS)

“ I’ve found it very satisfying to see the assignment  
become reality  
and part of clinical use –  
rather than gathering dust in a memory stick in the back of my drawer!”

**ROB TICEHURST,**  
POSTGRADUATE STUDENT (HEALTH INFORMATICS)
