

Table Exercise

Exercise 1: Write a fragment of HTML5 code that will generate a table with 2 rows and 1 column. The text in the first row should be “first row” and the text in the second row should be “second row”. The table should have a 1 pixel border.

```
<table border="1px">  
  <tr>  
    <td>First row</td>  
  </tr>  
  <tr>  
    <td>Second row</td>  
  </tr>  
</table>
```

CSS Exercise

Exercise 2: What is a “selector” in a CSS style?

A selector specifies to the HTML element that we want to style. Selectors are typically names of tags e.g. body, p, h1 etc. There are 2 types of user specified selectors as well: class selectors and id selectors.

CSS Exercises

```
<!DOCTYPE html>
<html>
<head>
  <meta charset="UTF-8">
  <title>Simple CSS Example</title>
  <style type="text/css">
    p {color: green;}
  </style>
</head>
<body>
  <h1>Test Page</h1>
  <p>Hello World</p>
</body>
</html>
```

CSS Exercises

Exercise 4: Put the following into decreasing order of priority. The item at the bottom of the list should have the lowest priority.

Internal style sheet, Browser default, Inline styles, External style sheet

1. Inline styles
2. Internal style sheet
3. External style sheet
4. Browser default
