

Font Exercises

Exercise 1: Define a style that is applied to all paragraphs and changes the font so that it is 16pt and bold.

- `p { font-size : 16pt;
font-weight : bold; }`

Exercise 2: Define a style that is applied to all h2 headings and changes the font to small caps.

- `h2 { font-variant : small-caps; }`

Exercise 3: Define the styles required to make all the text in the body of a document use italicised sans-serif font, preferably Verdana or Helvetica.

- `body { font-family: "Verdana", "Helvetica", sans-serif;
font-style: italic; }`
-

Color Exercises

Exercise 4: Define the styles required to make the background of the entire page silver, and the text coloured black. The main heading should have a black background and white font.

```
body { background-color: silver; }  
h1 { background-color: black; color: white; }
```

Exercise 5: Define a style for an id selector called “greenText” so that any element that uses it has green font. You must use hex values for the color. Write a fragment of HTML code that applies the style you have defined to the word “grass” in the paragraph “The grass is green”.

```
#greenText { color: #00ff00; }  
<p>The <span id="greenText">grass</span> is green</p>
```
