Exercise 1: Write a fragment of XHTML code that will generate a table with 2 rows and 1 column. The text in the first row should be “first row” and the text in the second row should be “second row”.

Exercise 2: What is a “selector” in a CSS style?

Exercise 3: What is the difference between a class selector and an id selector?
Exercise 4: Write a simple XHTML page with the title “Simple CSS example”. The body of the page should contain a single paragraph with the text “Hello”. The text should have the “color” property set to “green”. An internal style sheet should be used to define an appropriate style that can be applied to the paragraph.

Exercise 5: Put the following into increasing order of priority. The item at the bottom of the list should have the highest priority.

Internal Style, Browser Default, Inline Style, External Style

Exercise 6: What is the difference between div and span?
