SOFTENG 702/ COMPSCI 705

Deliverables for the Project Component

The second 30% component of the course is an implementation project, and done as a group of three people, but the components are marked individually.

Presentation:
- presentation performance itself: 2% towards the final grade (Individual work)
- presentation slides: 3% towards the final grade. (Groupwork)

Project deliverables:
- Plan and journal of work done, reflection: 1% towards the final grade. (Individual work)
- The implementation: 10% towards the final grade. (Groupwork)
- Testing framework and results: 2% towards the final grade.(Groupwork)
- Documentation: 9% towards the final grade. (Individual work)
- Morae video of the tool: 3% towards the final grade. (Groupwork)

The documentation component is project dependent and will be a zip of a website including download. It has to state:
- project objectives or purpose of the software,
- implementation design,
- user manual, installation guide
- status/completeness of the implementation.

The documentation can and should contain the information of the presentation slides, and the slideshow for download. The technical documentation of the code itself is part of the implementation component.

For groupwork, all members of the group will get the same mark, unless members of the group explicitly appeal to the lecturers.
