However, we must pay catering costs even if you do not attend the meeting. Therefore, until **Wednesday midday (11 September)** we are happy to receive your apologies. **In the case of no-show we will ask you to pay \$30.**

Topic: **The Journey to the Cloud: Bridging the Chasm**

While the concept of "cloud": can trace its roots to the 1960's it was only in the 1990's that "cloud" as we now know it started to emerge. Since then various governments have adopted "Cloud First" then "Cloud Smart" policies. The reality of cloud implementation is more complex and a more complete understanding of the implications, consequences and advantages has not yet been fully developed.

This presentation provides discussion on these aspects to assist organisations undertaking cloud migration or already using cloud.

Presenter: **Chris Roberts**

Chris holds a PhD in information science from Otago University (specialising in cybercrime and its risk management), is a qualified Management Accountant, Chartered Secretary, Governance professional and Information Systems Auditor. He has over 47 years of IT, consulting, commercial and technology assurance experience, almost 35 years of which he has specialised in technical security, technology risk management, IT assurance and IT governance.

He is currently the Head of Information Assurance and Cyber Security Research at New Zealand's National Cyber Security Centre. In this role he provides information assurance and technology security advice and guidance to NZ Government Agencies, and is responsible for the ongoing development of New Zealand's national technical security policy for NZ Government Agencies (the NZ Information Security Manual - NZISM).

He also delivers occasional guest lectures to the Wellington Institute of Technology and to Otago and

Victoria Universities as well as ISACA and other professional organisations.

Lech Janczewski

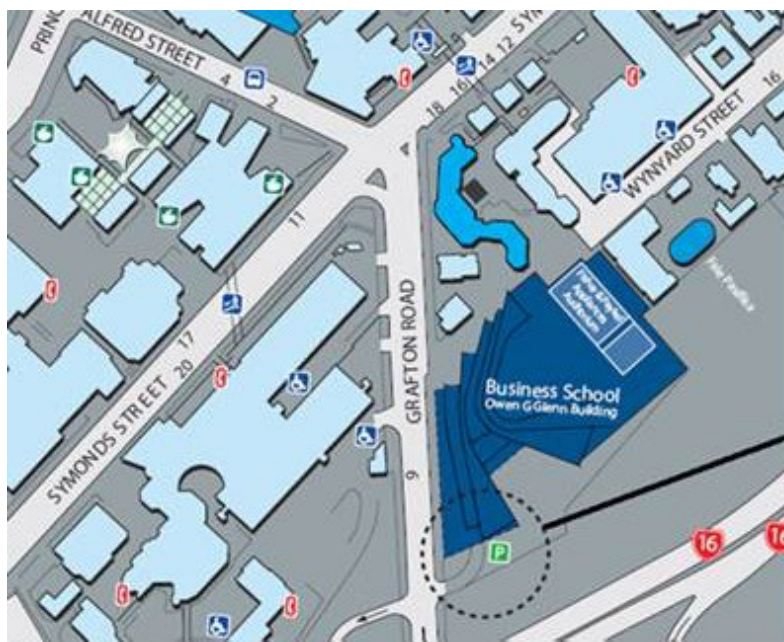

NZISF Chair
