Note: NZISF is non-profit organization. We are catering for all our members and friends and your place is reserved at the function. However, we must pay catering costs even if you do not attend the meeting. Therefore, until **Wednesday midday (13 November)** we are happy to receive your apologies. **In the case of no-show we will ask you to pay \$30.**

Topic: **One breach, several perspectives**

Each one is pretty much like any other: reported by a third-party, not that difficult to exploit vulnerability, millions of people affected. Should we assume all our data to be already compromised in order not to bother about the next one? In this talk I will cover one of the most recent high-profile data breaches from the perspectives of mass media coverage, business impact, legal consequences for an attacker, the attack itself and what could have been done from the defense perspective

Presenter: **Sergey Ozernikov**

Sergey has 11+ years of experience in information security, primarily focusing on the technical side of it. Since arriving in New Zealand in 2013 he has worked both as a client-facing consultant and in internal security roles. Recent experience covers financial services, cloud and telecommunications industries.
