Australasian Information Security Conference (ACSW-AISC) 2013 Call for Papers

ACSW-AISC promotes research on all aspects of information security. Our goal is to improve communication between security practitioners and researchers. For more than a decade, AISC or its predecessor AISW has been one of the streams of the Australasian Computer Science Week (ACSW). We will continue this tradition at ACSW 2013, in Adelaide from 29 January to 1 February.

We welcome submissions from academic and industrial researchers on all practical and theoretical aspects of information security. Suggested topics include, but are not restricted to, the following.

- Access control
- Anonymity and pseudonymity
- Cryptography and cryptographic protocols
- Database security
- Digital forensics
- Identity management and identity theft
- Intrusion detection and prevention

Program Co-Chairs

Clark Thomborson University of Auckland Udaya Parampalli University of Melbourne

Program Committee

Lynn Batten, Deakin University Serdar Boztas, RMIT University Philip Branch, Swinburne U. of Technology Ljiljana Brankovic, University of Newcastle Raymond Choo, U. of South Australia Sherman S. M. Chow, U. of Waterloo & CUHK Peter Komisarczuk, U. of West London Chris Mitchell, Royal Holloway U. of London Paul Montague, DSTO, Australia

- Information hiding and steganography
- Malicious software
- Network security
- Privacy in social networks
- Privacy preserving data mining
- Trust and risk

Juan Gonzalez Nieto, Queensland U. of Technology Josef Pieprzyk, Macquarie University Jill Slay, Polytechnic of Namibia & U. of South Australia Ron Steinfeld, Monash University Willy Susilo, University of Wollongong Ian Welch, Victoria University of Wellington Duncan S. Wong, City University of Hong Kong Yang Xiang, Deakin University Xun Yi, Victoria University, Australia

Key dates

Submission of paper:	27 August 2012
Notification of authors:	8 October 2012
Final version:	$29 \ {\rm October} \ 2012$

Instructions for Authors

Authors are invited to submit original papers. Submissions must not substantially duplicate work that any of the authors have published elsewhere or are submitting concurrently to any other publication venue. The submission must be anonymous, with no author names, affiliations, acknowledgements, or obvious references. Contributions should be no more than 10 pages in CRPIT two-column format (http://crpit.com/AuthorsSubmitting. html). You may submit in single-column draft format, if you prefer.

There will be an award for the best student paper. To be considered for this award, the words "Student Paper" must appear at the top of the anonymous submission. At least 75% of the work on this paper must be done by the student. Usually, the student's name will appear first in the list of authors on the published version.

Papers will be judged on originality, significance, correctness and clarity. The contribution of the paper should be clearly explained in both general and technical terms.

Papers must be submitted electronically and be received by the submission deadline. Late submissions and non-electronic submissions will not be considered.

Submission details, and any updates to this call for papers, are available at http://cs.auckland.ac.nz/research/conferences/acsw-aisc2013.

Publication

The proceedings of ACSW-AISC 2013 will be published through the Australian Computer Society (ACS), in its Conferences in Research and Practice in Information Technology (CRPIT) series. Prior proceedings are available at http://crpit.com.

By ACSW policy, no article will appear in the final version of the proceedings unless one of its authors has delivered a presentation on it, in a 20-minute timeslot, as a registered attendee of ACSW-AISC 2013.
