4.2	Research Positions	3
4.3	Visiting Positions	3
4.4	Expert	4
5	Research²	5
5.1	Papers in Refereed Journals	5
5.2	Papers in Refereed Conference Proceedings	12
5.3	Papers in Refereed Collective Books	16
5.4	Books	17
5.5	Edited Books	18
5.6	Edited Special Issues of Journals	19
5.7	Research Reports	21
5.8	Refereed Abstracts	28
5.9	Miscellanea Papers and Reviews	29
5.10	Research Grants	34
5.11	Lectures at Conferences (Some Invited)	35
5.12	Seminar Presentations	41
5.13	Post-Doctoral Fellows	48
5.14	Research Seminars	48
5.15	Consulting	49
5.16	Interviews	49
5.17	Research Impact	50
5.18	Selected Parts from Reviews and Other Opinions	51
6	Teaching³	54
6.1	Undergraduate Courses	54
6.2	Graduate Courses	54
6.3	Textbooks and Lecture Notes	55
6.4	PhD Students	55
6.5	Masters Students	56
6.6	Other Graduate Supervision	58
6.7	Teaching Impact	59
7	Service and Administration	59
7.1	Selected Committee Work ⁴	59
7.2	Editorial Activity	60
7.3	Webmaster	61
7.4	Conferences and Workshops	61
7.4.1	Steering Committee	61
7.4.2	Programme Committee	61
7.4.3	Organising Committee	65
7.5	External Evaluator	66
7.5.1	Official Nominator	66
7.5.2	Referee for Journal and Conferences	66
7.5.3	Referee for Granting Agencies	67
7.5.4	Referee for Publishing Companies	68
7.5.5	Referee for Universities/Academies	68
7.5.6	Other	68

¹Current positions are emphasised.

²Cooperation with 127 colleagues from 29 countries.

³Courses I have created will be emphasised.

⁴Current positions are emphasised.

7.6	Reader of Ph.D., Master, Project Theses	69
7.7	Professional Societies	70
8	Awards and Distinction	70

1 Personal Data

Nationality: New Zealand and Romanian
Family Status: Married: Elena Calude (Ph.D.), senior lecturer, Massey University at Albany
One child: Andreea S. Calude, BSc (Mathematics), BA (Linguistics), 2001,
PhD 2008 (Linguistics), lecturer, Waikato University
Office: Computer Science Department
Level 5, Room 575, Science Centre 303
The University of Auckland
38 Princes Street
Private Bag 92019, Auckland
New Zealand
Email: cristian@cs.auckland.ac.nz
Webpage: www.cs.auckland.ac.nz/~cristian/

2 Education

1976–1977: Graduate Studies in Computer Science and Mathematics
Bucharest University, Romania
Degree: *Ph.D. in Computer Science* (1977)
Ph.D.Thesis: *Categorical Methods in Computation Theory*
Supervisor: Acad. S. Marcus
1971–1975: Undergraduate Studies in Computer Science and Mathematics
Bucharest University, Romania
Degrees: *B.Sc.(Hons) in Computer Science and Mathematics* (1975)
Computer Science Thesis: *Man–Computer Communication*
Mathematics Thesis: *Contextual Metrics*
Supervisor: Acad. S. Marcus
1967–1971: High–School Studies
National College “Vasile Alecsandri”, Galați, Romania

3 Expertise

3.1 Mathematics

Algorithmic information theory, quantum computing, discrete and constructive mathematics (measure theory), mathematical logic, computation theory (complexity theory, automata and formal language theory), topology, coding and information theory, dynamical systems, philosophy and history of mathematics.

3.2 Computer

Mathematica, HTML, \LaTeX , X–windows, computer architectures (conventional: PC, Mac, UNIX; unconventional: quantum, DNA, reversible), data communication, computer security, electronic publishing, social implications of computing, history and philosophy of computing.

3.3 Languages

Primary: English, French, Romanian. Secondary: Italian.

4 Work Experience⁵

4.1 Academic Positions

1. *Professor (Personal Chair in Computer Science), Computer Science Department, University of Auckland, Auckland, NZ*, from April 1994 on.
2. Adjunct Professor, Faculty of Mathematics and Informatics, “Ovidius” University of Constanța, Romania, from September 2000 to August 2004.
3. Associate Professor (May 1993 to March 1994), lecturer (December 1992 to May 1993), Computer Science Department, University of Auckland, Auckland, NZ.
4. *International Scientific Council, Black Sea University, Bucharest, Romania*, from 1994 on.
5. Professor (February 1994 to September 2000), Associate Professor (February 1991 to February 1994), Senior Lecturer (September 1983 to February 1991), Assistant Professor (September 1981 to September 1983), Associate Assistant Professor (September 1975 to September 1981), Department of Foundations Computer of Science, Faculty of Mathematics, Bucharest University, Romania.
6. Mathematics and Computer Science Teacher, School for Computer Science, Bucharest, Romania, from September 1975 to October 1978.

4.2 Research Positions

1. Research Associate and Member of the Council, The Centre for Logic and Informatics Bucharest, Romania, from May 2001 to December 2008.
2. *Research Associate, University of Canterbury, Christchurch, NZ*, from November 1999 on.
3. *Associate Member of the International Solvay Institutes, Brussels Free University, Brussels, Belgium*, from June 1998 on.
4. *Director, Centre for Discrete Mathematics and Theoretical Computer Science, University of Auckland, NZ*, from January 1998 on; co-director from May 1995 to December 1997.
5. Head of the Symbolic Computation Division, Bucharest University, Romania, from November 1991 to December 1994.
6. Senior Researcher and Scientific Secretary, Committee on Prospective Studies, Romanian Academy, Bucharest, Romania, from April 1989 to September 1992.
7. Mathematics Researcher, Department of Mathematics, INCREST, Bucharest, Romania, from September 1984 to February 1985.
8. Senior Computer Scientist, Department of Compiler Design, Research Institute for Computer Technique, Bucharest and Cluj, Romania, from September 1981 to July 1982.
9. Senior Researcher, Project on Goals, Processes and Indicators of Development (GPID), United Nations University, Tokyo, Japan, from November 1978 to December 1983.

4.3 Visiting Positions

1. Visiting Professor Chuo University, Tokyo, Japan, January 2013.
2. Visiting Fellow, Isaac Newton Institute of Mathematical Sciences, Cambridge University, UK, June–July 2012.
3. Visiting Professor, École Polytechnique, Paris, France, October–December, 2011.
4. Visiting Scholar, Australian National University, Canberra, Australia, March 2011.

⁵Current positions are emphasised.

5. Visiting Professor, École Normale Supérieure, Paris, France, July and October, 2009.
6. Visiting Researcher, Centre for Computational and Systems Biology, The Microsoft Research–University of Trento, Trento, Italy, July 2008.
7. Visiting Professor, Department of Computer Science, Martin-Luther-Universität, Halle, Germany, November 2006.
8. Visiting Professor, Department of Computer Science, Hong Kong University of Science and Technology, Hong Kong, August 2006.
9. Visiting Professor, Department of Decision Sciences, UNISA, Pretoria, South Africa, November–December 2005.
10. Visiting Academic, School of Computer Science and Software Engineering, Monash University, Melbourne, Australia, May–June 2004.
11. Visiting Researcher, Rovira i Virgili University, Tarragona, Spain, September–December 2003.
12. Visiting Professor, Second International Ph.D. School in Formal Languages and Applications, Rovira i Virgili University, Tarragona, Spain, 2003.
13. Visiting Professor, Centro de Modelamiento Matemático, Universidad de Chile, Santiago, Chile, August, 2003.
14. Visiting Professor, Université de Bourgogne, Dijon, France, June–August, 2003.
15. Visiting Professor, First International Ph.D. School in Formal Languages and Applications, Rovira i Virgili University, Tarragona, Spain, 2002.
16. Visiting Professor, Facultad de Ciencias Exactas y Naturales Universidad de Buenos Aires, Argentina, June, 2000.
17. Monbusho⁶ Visiting Professor, Japan Advanced Institute of Science and Technology, September–December, 1999.
18. Gastprofessor, Institut für Theoretische Physik, Technischen Universität Wien, Austria, June, 1994, and May–June, 1999.
19. Visiting Researcher, Sandia National Laboratories, Albuquerque, USA, April, 1999.
20. Visiting Professor, Department of Computer Science, University of Western Ontario, London, Canada, Fall 1992, October–November 1993, and February–March, 1999.
21. Visiting Professor, Department of Mathematics, University of Chicago, Chicago, USA, February, 1999.
22. Visiting Researcher, International Solvay Institutes, Brussels Free University, Brussels, Belgium, June 1998.
23. Visiting Researcher, Danish Mindship Foundation, Copenhagen, Denmark, June–July, 1996.
24. Visiting Professor, Department of Mathematics, Turku University, Turku, Finland, April–May, 1991.

4.4 Expert

1. FP6 evaluator, European Commission - DG Research, Brussels, Belgium, 2006.
2. FP7 evaluator, European Commission - DG Research, Brussels, Belgium, 2012.
3. Expert evaluator, European Science Foundation, Strasbourg, France, 2006–2012.

⁶Japan Ministry of Education, Science, Sports and Culture.

5 Research⁷

5.1 Papers in Refereed Journals

1. C. S. Calude, E. Calude. Algorithmic complexity of mathematical problems: an overview of results and open problems, *International Journal of Unconventional Computing*, accepted.
2. M. Burgin, C. S. Calude, E. Calude. Inductive complexity measures for mathematical problems, *International Journal of Foundations of Computer Science*, accepted.
3. A. Abbott, C. S. Calude, K. Svozil. A quantum random number generator certified by value indefiniteness, *Mathematical Structures in Computer Science*, 2011, accepted.
4. C. S. Calude, E. Calude, M. S. Queen. Inductive complexity of the P versus NP problem, *Parallel Processing Letters* 23, 1 (2013), 1350007-1–1350007-16.
5. C. S. Calude. The halting problem, *Canadian Mathematical Society Notes*, 45, 2, March-April (2013), 16–17.
6. D. H. Bailey, J. M. Borwein, C. S. Calude, M. J. Dinneen, M. Dumitrescu, A. Lee. An empirical approach to the normality of π , *Experimental Mathematics* 21, 4 (2012), 375–384.
7. A. A. Abbott, C.S. Calude, J. Conder, K. Svozil. Strong Kochen-Specker theorem and incomputability of quantum randomness, *Physical Review A* 86, 6 (2012), DOI: 10.1103/PhysRevA.00.002100.
8. C. S. Calude, B. S. Cooper. Introduction: computability of the physical, *Mathematical Structures in Computer Science* 22, 05 (2012), 723–728.
9. A. Abbott, C. S. Calude. Von Neumann normalisation of a quantum random number generator, *Computability*, 1 (2012), 59–83.
10. C. S. Calude, E. Calude, M. S. Queen. The complexity of Euler’s integer partition theorem *Theoretical Computer Science* 454 (2012), 72–80.
11. A. A. Abbott, M. Bechmann, C. S. Calude, A. Sebald. A nuclear magnetic resonance implementation of a classical Deutsch-Jozsa algorithm, *International Journal of Unconventional Computing* 8,2 (2012), 161–175.
12. A. Abbott, C. S. Calude, K. Svozil. On demons and oracles, *Asia Pacific Mathematics Newsletter* 2,1 (2012), 9–15.
13. C. S. Calude, K. Salomaa, T. K. Roblot. State-size hierarchy for FS-complexity, *International Journal of Foundations of Computer Science* 23, 1 (2012) 37–50.
14. C. S. Calude, J. P. Lewis. Is there a universal image generator? *Applied Mathematics and Computation* 218 (2012), 8151–8159.
15. A. Akhtarzada, C. S. Calude, J. Hosking. A multi-criteria metric algorithm for recommender systems, *Fundamenta Informaticae* 110 (2011), 1–11.
16. C. S. Calude, K. Salomaa, T. K. Roblot. Finite state complexity, *Theoretical Computer Science* 412 (2011), 5668–5677.
17. C. S. Calude, A. Nies, L. Staiger and F. Stephan. Universal recursively enumerable sets of strings, *Theoretical Comput. Sci.* 412 (2011), 2253–2261.
18. C. S. Calude, M. Cavaliere, R. Mardare. An observer-based de-quantisation of Deutsch’s Algorithm, *International Journal of Foundations of Computer Science* 22, 1 (2011), 191–202.
19. C. S. Calude, E. Calude and K. Svozil. The complexity of proving chaoticity and the Church-Turing Thesis, *Chaos* 20 037103 (2010), 1–5.

⁷Cooperation with 127 colleagues from 29 countries.

20. C. S. Calude, N. J. Hay, F. Stephan. Representation of left-computable ε -random reals, *Journal of Computer and System Sciences* 77 (2011), 812–819.
21. C. S. Calude, M. J. Dinneen, M. Dumitrescu, K. Svozil. Experimental evidence of quantum randomness incomputability, *Physical Review A* 82, 022102 (2010), 1–8.
22. C. S. Calude, L. Staiger. A note on accelerated Turing machines, *Mathematical Structures in Computer Science*, 20 (2010), 1011–1017.
23. C. S. Calude, E. Calude. The complexity of the Four Colour Theorem, *LMS J. Comput. Math.* 13 (2010), 414–425.
24. C. S. Calude. Simplicity via provability for universal prefix-free Turing machines, *Theoretical Comput. Sci.* 412 (2010), 178–182.
25. C. S. Calude, E. Calude. Evaluating the complexity of mathematical problems. Part 2, *Complex Systems* 18 (2010), 387–401.
26. C. S. Calude, G. J. Chaitin. What is ... a halting probability? *Notices of the AMS* 57, 2 (2010), 236–237.
27. C. S. Calude, M. Zimand. Algorithmically independent sequences, *Information and Computation* 208 (2010), 292–308.
28. C. S. Calude, E. Calude. Evaluating the complexity of mathematical problems. Part 1, *Complex Systems* 18 (2009), 267–285.
29. C. S. Calude, N. J. Hay. Every computably enumerable random real is provably computably enumerable random, *Logic Jnl. IGPL* 17 (2009,) 325–350.
30. C. S. Calude, H. Jürgensen and L. Staiger. Topology on words, *Theoretical Comput. Sci.* 410 (2009), 2323–2335.
31. C. S. Calude and L. Staiger. On universal computably enumerable prefix codes, *Mathematical Structures in Computer Science* 19 (2009), 45–57.
32. C. S. Calude, K. Svozil. Quantum randomness and value indefiniteness, *Advanced Science Letters* 1 (2008), 165–168.
33. C. S. Calude, M. A. Stay. Most programs stop quickly or never halt, *Advances in Applied Mathematics*, 40 (2008), 295–308.
34. C. S. Calude. De-quantising the solution of Deutsch’s problem, *International Journal of Quantum Information* 5, 4(2007), 1–7.
35. C. S. Calude, M. J. Dinneen. Exact approximations of omega numbers, *Int. Journal of Bifurcation & Chaos* 17, 6 (2007), 1937–1954.
36. C. S. Calude, G. J. Chaitin. A dialogue on mathematics & physics, *The Rutherford Journal: The New Zealand Journal for the History and Philosophy of Science and Technology*, Vol. 2, 2006–2007.
37. C. S. Calude, M. A. Stay. Natural halting probabilities, partial randomness, and Zeta functions, *Information and Computation* 204 (2006), 1718–1739.
38. C. S. Calude, E. Calude, M. J. Dinneen. A new measure of the difficulty of problems, *Journal for Multiple-Valued Logic and Soft Computing* 12 (2006), 285–307.
39. C. S. Calude, C. Câmpeanu, M. Dumitrescu. Automata recognizing no words: A statistical approach, *Fundamenta Informaticae* 72 (2006), 1–18.

54. C. Calude. Semiotic analysis of a morphological experiment in a programming language, in S. Chatman, U. Eco, J. M. Klinkenberg (eds.). *Approaches to Semiotics*, Proc. of the First Congress IAS, 1973, Mouton, The Hague, 1979, 433–436. (in French)

5.3 Papers in Refereed Collective Books

1. C. S. Calude. Afterword: Is all computation?, in H. Zenil (ed.). *Irreducibility & Computational Equivalence. Ten Years After Wolframs A New Kind of Science*, Springer, 2013, 475–480.
2. C. S. Calude, K. Svozil. Is feasibility in physics limited by fantasy alone? in H. Zenil (ed.). *A Computable Universe: Understanding Computation & Exploring Nature as Computation*, World Scientific, Singapore, 2012, 525–537.
3. C. S. Calude, W. Meyerstein, A. Salomaa. The Universe is lawless or “Pantôn chrêmatôn metron anthrôpon einai”, in H. Zenil (ed.). *A Computable Universe: Understanding Computation & Exploring Nature as Computation*, World Scientific, Singapore, 2012, 539–547.
4. C. S. Calude, L. Staiger, M. Stay, Halting and non-halting Turing computations, in S. B. Cooper, J. van Leeuwen (eds.). *Alan Turing, His Work and Impact*, Elsevier, Amsterdam, 2012, to appear.
5. A. A. Abbott, C. S. Calude, K. Svozil. A quantum random oracle, in S. B. Cooper, J. van Leeuwen (eds.). *Alan Turing, His Work and Impact*, Elsevier, Amsterdam, 2012, to appear.
6. C. S. Calude. Randomness everywhere: My path to algorithmic information theory, in H. Zenil (ed.). *Randomness Through Computation*, World Scientific, Singapore, 2011, 179–189.
7. C. S. Calude, J. L. Casti, G. J. Chaitin, P. C. W. Davies, K. Svozil, S. Wolfram. Is the universe random? in H. Zenil (ed.). *Randomness Through Computation*, World Scientific, Singapore, 2011, 309–350.
8. C. S. Calude, G. J. Chaitin, E. Fredkin, A. T. Legget, R. de Ruyter, T. Toffoli, S. Wolfram. What Is Computation? (How) Does nature compute? in H. Zenil (ed.). *Randomness Through Computation*, World Scientific, Singapore, 2011, 351–403. Also in H. Zenil (ed.). *A Computable Universe: Understanding Computation & Exploring Nature as Computation*, World Scientific, Singapore, 2012, 673–725.
9. C. S. Calude, M. J. Dinneen, A. M. Gardner. Opening the book of randomness, in R. Copeland (ed.). *DIASPAR. A Mapping of Randomness*, 2010.
10. C. S. Calude, E. Calude, S. Marcus. Proving and programming, in C. S. Calude (ed.). *Randomness & Complexity, from Leibniz to Chaitin*, World Scientific, Singapore, 2007, 310–321.
11. V. A. Adamyán, C. S. Calude, B. S. Pavlov. Transcending the limits of Turing computability, in T. Hida, K. Saitô, S. Si (ed.). *Quantum Information Complexity. Proceedings of Meijo Winter School 2003*, World Scientific, Singapore, 2004, 119–137.
12. C. S. Calude, S. Marcus. Mathematical proofs at a crossroad? in J. Karhumäki, H. Maurer, G. Păun, G. Rozenberg (eds.). *Theory Is Forever*, Lectures Notes in Comput. Sci. 3113, Springer-Verlag, Berlin, 2004, 15–28. Reprinted in S. Marcus. *Words and Languages Everywhere*, Polimetrica, Milano, 2007, 89–102.
13. J. J. Arulanandham, C. S. Calude, M. J. Dinneen. Balance machines: Computing = balancing, in N. Jonoska, G. Păun, G. Rozenberg (eds.). *Aspects of Molecular Computing*, Lectures Notes in Comput. Sci. 2933, Springer-Verlag, Berlin, 2003, 36–47.
14. C. S. Calude, L. Staiger. Generalisations of disjunctive sequences, in V. Bratka, M. Schröder, K. Weihrauch, N. Zhong (eds.). *Computability and Complexity in Analysis*, Informatik Berichte 302-8 FernUniversität in Hagen, 2003, 153–162.
15. C. S. Calude, B. Pavlov. The Poincaré–Hardy inequality on the complement of a Cantor set, in D. Alpay, I. Gohberg, V. Vinnikov (eds.). *Interpolation Theory, Systems Theory and Related Topics*, Operator Theory: Advances and Applications, Vol. 134, Birkhäuser Verlag, Basel, 2002, 187–208.
16. C. S. Calude, E. Calude, P. Kay. Liars, demons and chaos, in M. Ito, G. Păun, S. Yu (eds.). *Words, Semigroups, and Transductions*, World Scientific, Singapore, 2001, 33–46.

17. C. S. Calude, E. Calude, K. Svozil. Computational complementarity for probabilistic automata, in C. Martin-Vide, V. Mitrana (eds.). *Where Mathematics, Computer Science, Linguistics and Biology Meet*, Kluwer, Amsterdam, 2001, 99–113.
18. C. S. Calude, H. Jürgensen, S. Legg. Solving finitely refutable mathematical problems, in C. S. Calude, G. Păun (eds.). *Finite Versus Infinite. Contributions to an Eternal Dilemma*, Springer-Verlag, London, 2000, 39–52.
19. C. S. Calude, R. J. Coles. Program-size complexity of initial segments and domination relation reducibility, in J. Karhumäki, H. A. Maurer, G. Păun, G. Rozenberg (eds.). *Jewels Are Forever*, Springer-Verlag, Berlin, 1999, 225–237. (invited)
20. C. S. Calude, R. Coles, P. H. Hertling and B. Khossainov. Degree-theoretic aspects of computably enumerable reals, in S. B. Cooper, J. K. Truss (eds.). *Models and Computability*, Cambridge University Press, Cambridge, 1999, 23–39.
21. C. Calude. Computability and information, in E. Craig (ed.). *Routledge Encyclopedia of Philosophy*, Routledge, London, Vol. 2 (1998), 477–482. (invited)
22. C. Calude, J. Hromkovič. Complexity: a language-theoretic point of view, in G. Rozenberg, A. Salomaa (eds.). *Handbook of Formal Languages*, Vol. II, Springer-Verlag, Berlin, 1997, 1–60. (invited)
23. C. Calude, H. Maurer. Pocket mathematics, in Gh. Păun (ed.). *Mathematical Aspects of Natural and Formal Languages*, Scientific World, Singapore, 1994, 13–41. (invited)
24. C. Calude, I. Chițescu. Complexity: a source of randomness, *Modern Problems in Mathematical Research*, Vol.1, Bucharest University, Bucharest, 1990, 165–202. Also in C. Calude (ed.). *How to Cope with Complexity*, Ed. Academiei, Bucharest, 1993, 34–57. (in Romanian)
25. C. Calude. Meanings and texts: an algorithmic metaphor, in M. Balat, J. Deledalle-Rhodes (eds.). *Signs of Humanity*, Mouton de Gruyter, 1992, 95–97.
26. C. Calude. Gödel's theorem, a limit of formalization?, *The Book of Interferences*, Ed. științifică și enciclopedică, Bucharest, 1985, 63–68. (in Romanian)
27. C. Calude, Gh. Păun. On the adequacy of a grammatical model of the brain, in M. Drăgănescu (ed.). *Artificial Intelligence and Robotics*, Ed. Academiei, Bucharest, 1983, 45–50. (in Romanian)
28. C. Calude, Gh. Păun. The absence of contextual ambiguities in the programming languages Fortran and Assiris, in S. Marcus (ed.). *Contextual Ambiguities in Natural and Artificial Languages*, Comm. & Cognition, Vol. 2, Ghent, Belgium, 1983, 57–76.
29. C. Calude, S. Marcus, Gh. Păun. Empirical Information and Theoretical Constructs in the Study of Needs II, in S. Marcus (ed.). *Mathematical Methods in the Development Problematique*, Ed. Academiei, Bucharest, 1982, 39–59. (in Romanian)
30. C. Calude, C. Ș. Calude. Mathematical modeling and systemic approach in juridical sciences, in M. Malița (ed.). *Systems in Social Sciences*, Ed. Academiei, Bucharest, 1977, 105–109. (in Romanian)

5.4 Books

1. C. S. Calude. *Information and Randomness: An Algorithmic Perspective*, 2nd Edition, Revised and Extended, Springer-Verlag, Berlin, 2002, 490 pp. Forewords by G. Chaitin and A. Salomaa.
2. C. S. Calude, G. Păun. *Computing with Cells and Atoms*, Taylor & Francis Publishers, London, 2001, 336 pp.
3. C. S. Calude. *Constructive Mathematics*, Ed. științifică, Bucharest, 1995, 123 pp. (in Romanian)

4. C. Calude. *Theories of Computational Complexity*, Annals of Discrete Mathematics 35, North-Holland, Amsterdam, 1988, 500 pp.
5. C. Calude. *Computational Complexity. Qualitative Aspects*, Ed. științifică și enciclopedică, Bucharest, 1982, 300 pp. (in Romanian)
6. C. Calude. *True, but Unprovable*, Ed. științifică și enciclopedică, Bucharest, 1988, 110 pp. (in Romanian)
7. C. Calude, Gh. Păun. *The Mathematical Model: Tool and Viewpoint*, Ed. științifică și enciclopedică, Bucharest, 1982, 140 pp. (in Romanian)
8. C. Calude. *What Are the Programming Languages ?*, Ed. științifică și enciclopedică, Bucharest, 1978, 100 pp. (in Romanian)

5.5 Edited Books

1. C. S. Calude, J. Kari, I. Petre, G. Rozenberg (eds.). *Proc. 10th International Conference Unconventional Computation*, Lecture Notes Comput. Sci. 6714, Springer, Heidelberg, 2011, 247 pp.
2. C. S. Calude, G. Rozenberg, A. Salomaa (eds.). *Rainbow of Computer Science*, Springer, Lecture Notes Comput. Sci. 6570, Springer, Heidelberg, 2011, 285 pp.
3. C. S. Calude, V. Sassone (eds.). *TCS 2010. Proceedings of the 6th IFIP International Conference on Theoretical Computer Science*, Springer, Heidelberg, 2010, 398 pp.
4. C. S. Calude, M. Hagiya, K. Morita, G. Rozenberg (eds.). *Proc. 9th International Conference Unconventional Computation*, Lecture Notes Comput. Sci. 6079, Springer, Heidelberg, 2010, 194 pp.
5. C. S. Calude, J. F. Costa, N. Dershowitz, E. Freire, G. Rozenberg (eds.). *Proc. 8th International Conference Unconventional Computation*, Lecture Notes Comput. Sci. 5715, Springer, Heidelberg, 2009, 297 pp.
6. L. Beznea, V. Brănzănescu, C. S. Calude, H. Ene, M. Iosifescu, S. Marcus, R. Purice, D. Timotin (eds.). *Proceedings of the Sixth Congress of Romanian Mathematicians, Bucharest 2007*, Vol. 1, Scientific Contributions, Editura Academiei Române, Bucharest, 2009, 605 pp.
7. C. S. Calude, J. F. Costa, R. Freund, M. Oswald, G. Rozenberg (eds.). *Proc. 7th International Conference Unconventional Computation*, Lecture Notes Comput. Sci. 5204, Springer, Heidelberg, 2008, X, 259 pp.
8. C. S. Calude (ed.) *Randomness & Complexity, From Leibniz to Chaitin*, World Scientific, Singapore, 2007, 480pp.
9. S. G. Akl, C. S. Calude, M. J. Dinneen, G. Rozenberg, H. T. Wareham (eds.). *Proc. 6th International Conference Unconventional Computation*, Lecture Notes Comput. Sci. 4618, Springer, Heidelberg, 2007, 241 pp.
10. C. S. Calude, M. J. Dinneen, G. Păun, G. Rozenberg, S. Stepney (eds.). *Proc. 5th International Conference Unconventional Computation*, Lecture Notes Comput. Sci. 4135, Springer, Heidelberg, 2006, 270 pp.
11. C. S. Calude, M. J. Dinneen, M. J. Pérez Jiménez, G. Păun, G. Rozenberg (eds.). *Proc. 4th International Conference Unconventional Computation*, Lecture Notes Comput. Sci. 3699, Springer, Heidelberg, 2005, 266 pp.
12. C. S. Calude, E. Calude, M. J. Dinneen (eds.). *Proc. 8th International Conf. Developments in Language Theory, DLT'04*, Lecture Notes Comput. Sci. 3340, Springer, Heidelberg, 2004, 442 pp.

13. C. Calude, M. Dinneen, V. Vajnovski (eds.). *Proc. 4th International Conf. DMTCS'03*, Lecture Notes Comput. Sci. 2731, Springer-Verlag, Heidelberg, 2003, 307 pp.
14. C. S. Calude, M. J. Dinneen, F. Peper (eds.). *Unconventional Models of Computation (UMC'02)*, Lecture Notes Comput. Sci. 2509, Springer-Verlag, Heidelberg, 2002, 338 pp.

5.10 Research Grants

1. United Nations University (Tokyo) Research Grant, US\$60,000, for the project *Mathematical Paths in the Study of Human Needs*, 1978–1982. Team’s leader: Prof. S. Marcus.
2. Romanian Ministry of Education Research Grant, US\$18,000, for the project *Contributions to Descriptive Complexity*, 1988–1992.
3. Soros Foundation for An Open Society Fellowship, US\$2,800, to attend the *Colloquium on Semigroups, Formal Languages and Combinatorics on Words*, Kyoto Sangyo University, Japan, 1992.
4. UARC Grant A18/30/62090/3414012, NZ\$8,000, for the project *Random Numbers and Applications*, 1993.
5. UARC Grant, A18/30/62090/F3414018, NZ\$1,500, for the project *Random Numbers and Applications*, 1993.
6. UARC Grant, A18/30/62090/F3414022, NZ\$4,152, for the project *Random Numbers and Applications*, 1994.
7. AU Foundation Grant for supporting the visit of Professor H. Jürgensen, 1994.
8. UARC Grant, A18/30/62090/F3414030, 1994, NZ\$7,000, for the project *Random Numbers and Applications*.
9. UARC Grant, A18/30/62090/F3414044, 1995, NZ\$5,000, for the project *Randomness on Shift Spaces*.
10. UARC Grant, A18/30/62090/F3414050, NZ\$3,200, for the project *Randomness on Shift Spaces*, 1996.
11. UARC Post-Doctoral Fellowship, 1996, NZ\$92,250, for the project *Complexity and Randomness in Non-Linear Spaces*, 1997–1999.
12. UARC Grant, A18/30/62090/F3414056, NZ\$3,200, for the project *Physical versus Computational Complementarity*, 1996.
13. UARC Grant, A18/30/62090/F3414063, NZ\$4,000, for the project *Physical versus Computational Complementarity*, 1997.
14. UARC Grant, A18/30/62090/F3414069, NZ\$2,000 (with A. Arslanov), for the project *Topics in Algorithmic Information Theory*.
15. UARC Grant, A18/30/62090/F3414075, NZ\$4,000, for the project *Physical versus Computational Complementarity*, 1997.
16. Pukekohe Travel Research Grant for the Centre for Discrete Mathematics and Theoretical Computer Science, NZ\$25,000, 1997–2000.
17. UARC Grant, A18/30/62090/F3414082, NZ\$4,500, for the project *Physical versus Computational Complementarity*, 1998.
18. UARC Infrastructure Grant, A18/30/9343/3391207, 1998, NZ\$75,000 (with C. Collberg, M. Dinneen, P. Fenwick, P. Gibbons, H. Guesgen, J. Hamer, J. Hosking, B. Khoussainov, J. Lennon, R. Murgridge, P. Riddle, C. Thmborson, X. Ye).
19. Monbusho (Japan Ministry of Education, Science, Sports and Culture), Research and Travel Grant, 1999, Yen 727,000.
20. UARC Grant, 9343/3414111, NZ\$2,600, for the project *Complexity of Random Reals and Applications*, 2000.
21. AU Foundation Grant (with J. Hosking, F. Kroon) for supporting the visit of Professor J. Casti, 2000.

22. AU Graduate Research Fund 3602307/9343 (with J. Arulanandham), NZ\$1,600, for the project *Natural Algorithms*, 2002.
23. The Vice-Chancellor's University Development Fund 23124 (with H. Carmichael and B. Pavlov), NZ\$16,000, for the project *Trespassing the Turing Barrier via Quantum Computing*, 2002.
24. JSPS Grant-in-Aid for Scientific Research (C) No.15500005, (with D. Bridges, B. Khossainov, H. Ishihara and P. Schuster), Yen 360,000, for the project *Computability and Complexity in Constructive Mathematics*, 2003–2006.
25. AGAUR Grant 2002PIV 00052, Spain, for the project *Trespassing the Turing Barrier*, €7,500, 2003.
26. Comisión Nacional de Investigación Científica y Tecnológica Grant, Chile, US\$ 3,000, 2005.
27. University of South Africa Grant, South Africa, US\$ 4,000, 2005.
28. Comisión Nacional de Investigación Científica y Tecnológica Grant, Chile, US\$ 4,000, 2006.
29. UARC Grant, 3607894/9343, NZ\$7,000, for the project *Approximate Methods for the Halting Problem and Applications*, 2006–2007.
30. CS-PBRF Grant (with N. Hay) , *Provable Random C.E. Reals: Theory and Implementation in an Automated Reasoning System*, 2007, NZ\$4,225.
31. Hood Fellowship, 2008–2009, NZ\$20,600.
32. Leverhulme Trust Grant of the Academia Europaea, 2008, €500.
33. FRDF Grant (with J. Hosking), NZ\$ 20,000, for the project *Accessible software framework for multidimensional criteria decision making*, 2009–2010.
34. FRDF Grant (with A. Nies), NZ\$ 18,000, for the project *Finite state complexity*, 2009–2010.
35. Faculty of Science Masters Scholarship (for Alastair Abbott for the project *Quantum vs algorithmic randomness*), NZ\$15,000, 2010.
36. Faculty of Science Masters Scholarship (for Tania Roblot for the project *Topics in finite state complexity*), NZ\$15,000, 2010.
37. London Mathematical Society Travel Grant for a research visit to Oxford University, Leeds University and Edinburgh University, October–November 2010, £1200.
38. IRSES Grant RANPHYS (with G. Longo, ENS, Paris, T. Paul, École Polytechnique, Paris, K. Svozil, Vienna University of Technology, A. Abbott, C. S. Calude and M. J. Dinneen) Unit P2 (Marie Curie FP7-PEOPLE-2010-IRSES), 2011–2015, €88,200.

5.11 Lectures at Conferences (Some Invited)

1. C. S. Calude, E. Calude, M. S. Queen. Inductive complexity of P versus NP problem, *Unconventional Computation and Natural Computation*, Orléans, France, September 2012 (invited).
2. C. S. Calude. The Halting Problem Revisited, *The Incomputable*, Chicheley Hall, UK, June 2012. (invited)
3. C. S. Calude. [Alan Turing and the Unsolvability Problem. To Halt or Not to Halt—That Is the Question](#), The lead lecture on The Turing Legacy, *Gibbons Lecture Series*, University of Auckland, April 2012. (invited)
4. C. S. Calude. How Random is Quantum Randomness? *Asian Logic Conference*, Wellington, December 2011. (invited)

5. C. S. Calude, E. Calude. The Complexity of Mathematical Problems: An Overview of Results and Open Problems, *Dynamics of Complex Systems*, Valparaiso, Chile, November, 2011. (invited)
6. C. S. Calude. Probability, Randomness, Entropy. Convenience or Necessity? *Débat Sur la Phase Actuelle du Concept De Probabilité et D'Aléatoire*, École Normale Supérieure, Paris, France, October 2011. (invited)
7. C. S. Calude. Quantum randomness: Where Is It Coming From and How Random Is It? *Central European Quantum Information Processing Workshop*, Znojmo, Czech Republic, June 2011.
8. C. S. Calude. Understanding the Quantum Computational Speed-up via De-quantisation, *Workshop Developments in Computational Models*, Edinburgh, UK, July 2010. (invited)
9. C. S. Calude. Finite-state Complexity and Randomness, *Computability in Europe 2010*, Ponta Delgada, July 2010.
10. C. S. Calude. Infinities in Quantum Field Theory and in Classical Computing: Renormalization Program, by Yuri I. Manin, *Computability in Europe 2010*, Ponta Delgada, July 2010. (invited)
11. C. S. Calude. Finite-state Complexity and Randomness, *Conference on Logic, Computability and Randomness*, Notre Dame, USA, May 2010. (invited)
12. C. S. Calude. Arithmetic Progressions with Primes, *S. Marcus 85th Anniversary Symposium*, University of Bucharest, Romania, March 2010. (invited)
13. C. S. Calude. Finite-state Complexity, *S. Rudeanu 75th Anniversary Symposium*, University of Bucharest, Romania, February 2010. (invited)
14. C. S. Calude, E. Calude, M. Dinneen. The Complexity of the Riemann Hypothesis, *Riemann Hypothesis Day*, Auckland, NZ, November 2009. (invited)
15. Can Peano Arithmetic Prove Randomness? *Workshop "Theoretical Computer Science. From Foundation to Application*, Niš, Serbia, November 2009. (invited)
16. A Note on Accelerated Turing Machines, *Workshop on Hypercomputation*, Ponta Delgada, Portugal, September 2009. (invited)
17. Every Computably Enumerable Random Real Is Provably Computably Enumerable Random, *International Conference on Theory and Applications in Mathematics and Informatics*, Alba Iulia, Romania, September 2009. (invited).
18. Can Peano Arithmetic Prove Randomness? *4th Conference on Logic, Computability and Randomness*, CIRM Marseille, France, June-July 2009. (invited)
19. Randomness, Logic, and Computation, *Symposium Information Processing: Modern Perspectives*, Turku University, Turku, Finland, May 2009. (invited)
20. Incomputability in Physics: Does It Really Matter? *Science and Philosophy of Unconventional Computing (SPUC09)*, Cambridge, UK, March 2009. (invited)
21. Simplicity via Provability for Universal Prefix-free Turing Machines, *International Workshop on The Complexity of Simple Programs*, Cork, Ireland December, 2008. (invited)
22. Can Randomness Be Certified by Proof? *NKS 2008: What is Computation? How Does Nature Compute?*, Bloomington, USA, October 2008. (Invited)
23. Can Peano Arithmetic Prove Randomness?, *Workshop on Automata, Formal Languages and Algebraic Systems*, Kyoto, September 2008. (invited).
24. Incompleteness and Complexity, *10th International Workshop DCFS'08*, UPEI, Charlottetown, Canada, July 2008. (invited)

25. Mathematics and Law, *Kiwi Foo*, Warkworth, New Zealand, February 2008.
26. The Mathematician Moisil and the Phenomenon Moisil, *Moisil Symposium*, Romanian Academy, Bucharest, January 2008. (invited)
27. Representation of Computationally Enumerable ε -Random Reals, *Joint Meeting of the AMS-NZMS*, Wellington, NZ, December 2007. (invited speaker, Special Session “Computability Theory”)
28. Most Programs Stop Quickly or Never Halt, *Randomness and Complexity*, IBM Research, Yorktown, USA, November 2007. (invited)
29. Presentation of the books *Thinking about Gödel and Turing* and *Randomness and Complexity: From Leibniz to Chaitin*, University of Vienna and Erwin Schrödinger International Institute for Mathematical Physics, Vienna, Austria, November 2007. (invited)
30. Most Programs Stop Quickly or Never Halt, *Significant Advances in Computer Science*, Graz Technical University, Austria, November, 2007. (invited speaker, “Track 1: Foundations and Theory”)
31. On Universal Computationally Enumerable Prefix Codes, *Combinatorics and Related Areas*, Institute of Mathematics, Romanian Academy, Bucharest, Romania, November 2007.
32. C. S. Calude, H. Jürgensen, L. Staiger. Topology on Strings, *Workshop “Domains VIII and Computability over Continuous Data Types”*, Novosibirsk, Russia, September, 2007.
33. Proving and Programming, *A New Kind of Science NKS 2007*, Burlington, Vermont, USA, July 2007. (invited)
34. The Universe Is Probably Random, *A New Kind of Science NKS 2007*, Burlington, Vermont, USA, July 2007.
35. The Halting Problem and Experimental Mathematics, *6-th Congress of Romanian Mathematicians*, Bucharest, Romania, June-July, 2007.
36. Most Programs Stop Quickly or Never Halt, *4th Annual Conference on Theory and Applications of Models of Computation (TAMC07)*, Shanghai, China, May 2007. (invited speaker, Special Session “Computability and Randomness”)
37. Computing with Randomness, *Unconventional Computing 2006*, York, UK, September 2006. (invited 3-hour tutorial)
38. Incompleteness, Uncertainty and Complexity, *Turing’s Day 2006*, Istanbul Bilgi University, Turkey, May 2006. (invited)
39. Algorithmic Information Theory, *Workshop on Information Theories*, Münchenwiler, Switzerland, May 2006. (invited)
40. Incompleteness, Uncertainty and Complexity, *La Complessità di Gödel. Nel Centenario della nascita (1906–2006)*, University of Torino, Italy, April 2006. (invited)
41. Partial Randomness and Zeta Functions, *Kolmogorov Complexity and Applications*, Dagstuhl-Seminar 06051, January 2006. (invited)
42. Natural Halting Probabilities, Partial Randomness, and Physics Zeta Functions: A Moisilian Theory of Algorithmic Randomness, *Symposium Dedicate to Gr. C. Moisil Centenary*, Institute of Mathematics, Romanian Academy, January 2006. (invited)
43. *Is Quantum Randomness Algorithmic Random? A Preliminary Attack*, 1st International Conference on Algebraic Informatics, Aristotle University of Thessaloniki, Greece, October, 2005.(invited)
44. *Computing at the Speed of Light*, Workshop on Natural Processes and Models of Computation, Bologna, Italy, 2005. (invited)

45. *Complexity, Provability and Incompleteness*, Special Session on Complexity of Computation and Algorithms, AMS Sectional Meeting Santa Barbara, USA, April, 2005. (invited)
46. *Topology, Randomness & Uncertainty*, One Day Symposium Celebrating Professor David Gauld, Auckland University, NZ, December 2004. (invited)
47. *Algorithmic Randomness, Quantum Physics, and Incompleteness*, International Conference on Machine, Computation and Universality (MCU'2004), Euler International Mathematical Institute, S. Petersburg, Russia, September 2004. (invited)
48. C. S. Calude, L. Staiger. *Generalisations of Disjunctive Sequences*, International Conference on Computability and Complexity in Analysis (CCA 2003), University of Cincinnati, USA, August 2003.
49. C. S. Calude, E. Calude, S. Marcus. *To Prove or Not to Prove, That Is the Question*, 5th Congress of Romanian Mathematicians, Pitești, Romania, June 2003.
50. *What is Turing's Halting Problem?*, NZ Mathematical Colloquium, Auckland, NZ, December 2002. (invited)
51. *A Quantum Attack on Undecidable Problems: An Informal Discussion*, Unconventional Models of Computation 2002, Kobe, Japan, October 2002.
52. *A Quantum Attack on Undecidable Problems*, Quantum Structures 2002, Vienna, Austria, July 2002.
53. *Passages of Proof*, Workshop on Truths and Proofs, Auckland University, December 2001.
54. *Automata, from Uncertainty to Quantum*, Developments in Language Theory, Vienna, Austria, July 2001. (invited)
55. *QED vs QD*, DMTCS'01, Constanța, Romania, July 2001.
56. *Molecular and Quantum Computing: Dreams or Nightmare?*, 21 Anniversary Symposium, Auckland University, February 2001.
57. *Real Numbers: From Computable to Random*, The Second Pacific Rim Conference on Mathematics, Institute of Mathematics, Academia Sinica, Taipei, Taiwan, January 2001. (invited)
58. *Who Is Afraid of Randomness?*, Millennial Symposium 'Defining the Science of Stochastics', Würzburg, Germany, October 2000. (invited)
59. *Liars, Demons and Chaos*, The 5th Anniversary Workshop on Discrete Mathematics and Theoretical Computer Science, Auckland University, May 2000.
60. *Recent Results on Chaitin Omega Numbers*, Workshop on Constructivity, Complexity and Fuzzyness (CCF'99), Galați, Romania, August 1999. (invited)
61. *Computable Enumerable Reals*, The Eighth International Colloquium on Numerical Analysis and Computer Science with Applications, Plovdiv, Bulgaria, August 1999. (one-hour invited lecture)
62. *A Characterization of C.E. Random Reals*, Workshop Descriptive Complexity of Automata, Grammars and Related Structures, (DCAGRS'99), Magdeburg, Germany, July 1999.
63. *Metric Lexical Analysis*, Workshop Implementing Automata'99 (WIA'99), Potsdam, Germany, July, 1999.
64. *Quantum Correlations Conundrum: An Automaton-Theoretic Approach*, Workshop Implementing Automata'99 (WIA'99), Potsdam, Germany, July 1999.
65. *Bisimulations and Behaviour of Nondeterministic Automata*, Developments in Language Theory (DLT'99), Aachen, Germany, July 1999.

66. *Sudan's function*, Workshop on G. Sudan Centenary, Romanian Academy, Bucharest, Romania, May 1999. (invited)
67. *Computable Approximations of Reals: An Information-theoretic Analysis*, Third International Conference on Information-Theoretic Approaches to Logic, Language, and Computation, Hsi-tou, Taiwan, June 1998.
68. *Recursively Enumerable Reals and Chaitin Ω Numbers*, STACS'98, The 15th Annual Symposium on Theoretical Aspects of Computer Science, Paris, France, January 1998.
69. *Chaitin Ω Numbers and Strong Reducibilities*, The First Japan–NZ Workshop Logic in Computer Science, CDMTCS, Auckland, NZ, August 1997.
70. *Computational Complementarity via Incomplete Automata and Shift Spaces*, International Conference Integrability and Chaos in Discrete Systems, International Solvay Institutes, Brussels, Belgium, July 1997. (invited lecture)
71. *Deterministic Automata: Simulation, Universality and Minimality*, Developments in Language Theory, DLT'97, Thessaloniki, Greece, July 1997.
72. *Do the Zeros of Riemann's Zeta Function Form a Random Sequence?*, Schloss Dagstuhl Seminar on Constructivity and Complexity in Analysis, Dagstuhl, Saarbrücken, Germany, April, 1997. (invited lecture)
73. *Automata for Physics*, Workshop Computability and Related Matters in Mathematics and Physics, CDMTCS, Hamilton, NZ, February 1997.
74. *Recollections on Paul Erdős*, Paul Erdős Mini–Seminar, Auckland University, September, 1996.
75. *The Typical Number Is a Lexicon*, AFL'96 (8th Conference on Automata and Formal Languages), Salgotarjan, Hungary, July 1996.
76. *The Concept of Complexity*, Seminar Order, Complexity and Beauty, The Project “Third Culture Copenhagen”, Danish Mindship Foundation, Copenhagen, Denmark, July, 1996. (invited lecture)
77. *The Web Attitude*, Graduate Student Workshop, Auckland University, March, 1996.
78. *A Virtual Letter to Gr. C. Moisil*, Symposium Dedicated to Gr. C. Moisil, Romanian Academy, Bucharest, Romania, March, 1996.
79. *Language-Theoretic Complexity of Disjunctive Sequences*, CATS'97 (Computing: the Australian Theory Seminar), Melbourne, Australia, January, 1996.
80. *Can Ignorance Help?*, Ken Ashton Mini–Conference, Auckland University, July, 1995.
81. *Randomness-Preserving Transformations*, Summer School Chaitin Complexity and Applications, Black Sea University, Mangalia, Romania, July 1995.
82. *J. UCS: A New Publication in Cyberspace*, ROSE'94, The Second Romanian Conference on Open Systems, Bucharest, Romania, November, 1994.
83. *What Is a Random String?*, Symposium The Foundational Debate. Complexity and Constructivity in Mathematics and Physics, Vienna, Austria, September, 1994. (plenary invited address)
84. *Gödel's Incompleteness Theorem: An Information-Theoretic Perspective*, 1994 George Hughes Memorial Conference, Australasian Association for Logic, Dunedin, NZ, August, 1994.
85. *Randomness as an Invariant for Number Representations*, Symposium Results and Trends in Theoretical Computer Science, Graz, Austria, June, 1994. (invited lecture)
86. *Experimental Mathematics*, Symposium Romania and Romanians in Contemporary Science, Sinaia, Romania, June, 1994. (invited lecture)

87. *The Basics of L^AT_EX*, A Half-Day Course Getting Started with L^AT_EX, Auckland University, May, 1994.
88. *On Recursive Bounds for the Exceptional Values in Speed-up*, 1994 N.Z. Mathematics Colloquium, Hamilton, NZ, April, 1994.
89. *Pocket Mathematics*, Symposium Salodays in Auckland, Auckland University, March, 1994.
90. *Information and Randomness: An Overview*, Schloss Dagstuhl Seminar on Structure on Complexity, Dagstuhl, Saarbrücken, Germany, February, 1994. (invited lecture)
91. *Coding Without Tears*, Symposium on Combinatorics, Algebra and Topology in Logic and Languages, Romanian Academy, Bucharest, Romania, January, 1994.
92. *Three Theories of Computational Complexity*, ROSYCS'93, Iași, Romania, November, 1993. (invited lecture)
93. *More About the Halting Probability*, Informatics Workshops 1993, University of Auckland, NZ, August, 1993.
94. *The Randomness Hypothesis*, Conference Developments in Language Theory, University of Turku, Finland, July, 1993. (invited lecture)
95. *Borel Normality and Algorithmic Randomness*, Conference Developments in Language Theory, University of Turku, Finland, July, 1993.
96. *How Should I Forget?*, Symposium Dedicated to Gr. C. Moisil, Romanian Academy, Iași, Romania, May, 1993.
97. *Two Questions on Chaitin's Model of Randomness*, Conference Does God Play Dice?, University of Auckland, NZ, February, 1993.
98. *Topological Methods in Complexity Theory*, Computer Science Colloquium, Waikato University, Hamilton, NZ, February, 1993.
99. *Elementary Algorithmic Information Theory: Borel Normality and Algorithmic Randomness*, Workshop on Semigroups, Formal Languages and Combinatorics on Words, Kyoto Sangyo University, Japan, August, 1992.
100. *On Three Theorems in Abstract Complexity Theory: A Topological Glimpse*, The Second International Colloquium on Words, Languages and Combinatorics, Kyoto Sangyo University, Japan, August, 1992.
101. *Elementary Algorithmic Information Theory*, Colloquium SALODAYS in Theoretical Computer Science, Bucharest University, Romania, June, 1992.
102. *Constructive Negligible Sets in Complexity Theory*, Fifth International Conference on Discrete Mathematics, Dortmund, Germany, September, 1991. (invited lecture)
103. *Recursive Baire Classification, Speedable Functions and Independent Statements*, Mathematical Logic Week, Oberwolfach, Germany, December, 1990. (invited lecture)
104. *The Development of Computer Science in Romania*, Future Trends in Information Technology, Salzburg, Austria, September, 1990. (invited lecture)
105. *Determining and Stationary Sets for Some Classes of Partial Recursive Functions*, Third Logical Biennial Summer School and Conference, Kleene'90, Varna, Bulgaria, June, 1990.
106. *Mathematics and Informatics: Some Lessons and Key Points of Reflection*, International Workshop On Informatics Curricula for the 1990s, Providence, RI, USA, April, 1990.
107. *On Kraft-Chaitin Inequality*, Logic Colloquium'89, European Summer Meeting of the Association for Symbolic Logic, West Berlin, Germany, July, 1989.

108. *Descriptive Complexity and Natural Languages*, PROCOMP'89, Central Institute for Informatics, Bucharest, Romania, October, 1989. (invited lecture)
109. *Complexity as a Source of Randomness*, Workshop How to Cope with Complexity, Romanian Academy, Bucharest, Romania, October, 1989.
110. *On B. Russell Definition of Mathematics*, National Colloquium Info-Iași'89, Romania, October, 1989. (invited lecture)
111. *Ehrenfeucht Test Set Theorem and Hilbert Basis Theorem: A Constructive Glimpse*, Symposium Mathematical Foundations of Computer Science, Porabka-Kozubnik, Poland, September, 1989.
112. *Languages, Effectivity and Constructive Mathematics*, Second National Colloquium on Languages, Logic and Mathematical Linguistics, Braşov, Romania, June, 1988.
113. *Ehrenfeucht's Property and Constructivity*, National Colloquium Info-Iași'87, Romania, October, 1987. (invited lecture)
114. *Romanian Results in Recursion Function Theory: 1927-1987*, Computer Center Anniversary Symposium, Bucharest University, Romania, February, 1987. (invited lecture)
115. *Super-exponentials Non-Primitive Recursive, but Rudimentary*, Advanced International Summer School and Conference on Mathematical Logic and Its Applications, Gödel'86, Druzhba, Bulgaria, June, 1986.
116. *P. Martin-Löf Tests: Representability and Embeddability*, National Colloquium Info-Iași'85, Romania, October, 1985. (invited lecture)
117. *On a class of Independent Problems Related to Rice's Theorem*, National Colloquium Info-Iași'83, Romania, October, 1983. (invited lecture)
118. *Dilemmas of Computational Complexity*, Symposium Mathematics, Today and Tomorrow, Romanian Academy, Bucharest, Romania, June, 1983. (invited lecture)
119. *Independent Instances for Some Undecidable Problems*, Logic Colloquium'82, European Summer Meeting of the Association for Symbolic Logic, Florence, Italy, August, 1982.
120. *On Per Martin-Löf Random Sequences*, Workshop On Recursion Aspects of Computer Science, Purdue University, USA, June, 1981.
121. *On Per Martin-Löf Random Sequences*, National Colloquium Info-Iași'81, Romania, October, 1981.
122. *Knuth Test on Compiler Efficiency*, The 4th International Conference on Control Systems and Computer Science, Polytechnical Institute, Bucharest, Romania, July, 1981.
123. *The Universal Grammar as a Hypothetical Brain*, International Symposium on Mathematics in System Theory, Braşov, Romania, November, 1978.
124. *The Category of Čech Topological Spaces*, Colloquium on Topology, Budapest, Hungary, August, 1978.
125. *Pompeiu's Distance Between Closed Sets*, Symposium on Geometry and Global Analysis, Romanian Academy, Bucharest, Romania, October, 1973.

5.12 Seminar Presentations

1. *The Kochen-Specker Theorem and Quantum Randomness*, Chuo University, Tokyo, January 2013.
2. *The Complexity of Mathematical Problems*, Chuo University, Tokyo, January 2013.

3. *Is the Conjecture $P \neq NP$ Algorithmically more Complex than the Riemann Hypothesis?* University of Bucharest, Romania, September 2012.
4. *The Halting Problem Revisited*, Loughborough University, UK, June 2012.
5. *The Concept of Algorithmic Randomness*, Séminaire Philosophie de l'informatique, de la logique et de leurs interfaces, École Normale Supérieure, Paris, France, June 2012.
6. *The Power and Limits of Quantum Computing*, Reason and Science Society, Auckland, August 2011.
7. *Is Quantum Randomness Pseudo-Randomness?* Imperial College, London, UK, July 2011.
8. *Is Quantum Randomness Pseudo-Randomness?* Research Centre for Computer-Assisted Research Mathematics and its Applications, The University of Newcastle, Newcastle, Australia, March 2011. (CARMA Colloquium Lecture)
9. *Is Quantum Randomness Pseudo-Randomness?* Research School of Information Sciences and Engineering, Australian National University, Canberra, Australia, March 2011.
10. *Is Quantum Randomness Pseudo-Randomness?* Martin-Luther-Universität, Halle, Germany, October 2010.
11. *Is Quantum Randomness Pseudo-Randomness?* Leipzig Universität, Leipzig, Germany, October 2010.
12. *Is Quantum Randomness Pseudo-Randomness?* Oxford University, November 2010.
13. *Is Quantum Randomness Pseudo-Randomness?* University of Leeds, November 2010.
14. *Representation of Left-Computable ε -Random Reals*, University of Leeds, UK, November 2010.
15. *Finite-State Randomness*, University of Western Ontario, London, Canada, August 2010.
16. *Understanding the Quantum Computational Speed-up via De-quantisation*, Queen's University, Kingston, Canada, August 2010.
17. *Algorithmic Randomness: A Primer*, University of Bucharest, November 2009. (Colloquium Lecture)
18. *Algorithmic Randomness: A Primer*, École Normale Supérieure, Paris, France, October 2009. (Colloquium Lecture)
19. *Can Peano Arithmetic Prove Randomness?*, Department of Mathematics, Canterbury University, NZ, October 2009. (Colloquium Lecture)
20. *AIT and Quantum Physics*, Seven Lectures, École Normale Supérieure, Paris, France, July 2009.
21. *Can Peano Arithmetic Prove Randomness?*, National University of Singapore, Singapore, May 2009.
22. *Incompleteness: A Personal Perspective*, Google Technical Talk, Mountainview, USA, 4 November 2008.
23. *Incompleteness: A Personal Perspective*, Würzburg University, Germany, October 2008. (Colloquium Lecture)
24. *Can Peano Arithmetic Prove Randomness?*, École Normale Supérieure, Paris, France, September 2008.
25. *Halting or Non-Halting: That is the Question*, Centre for Computational and Systems Biology, The Microsoft Research–University of Trento, Trento, Italy, July 2008.
26. *Most Programs Stop Quickly or Never Halt*, Queen's University, Kingston, Canada, November 2007.

27. *Algorithmic versus Quantum Randomness*, Erwin Schrödinger International Institute for Mathematical Physics, Vienna, Austria, November 2007.
28. *Representation of Computably Enumerable ε -Random Reals*, CDMTCS Seminar, October, 2007.
29. *Most Programs Stop Quickly or Never Halt*, University of Western Ontario, London, Canada, August 2007. (Colloquium Lecture)
30. *Most Programs Stop Quickly or Never Halt*, Mathematics and Statistics Seminar, University of Canterbury, Christchurch, February 2007.
31. *A New Probabilistic Approach to the Halting Problem*, Heidelberg University, Germany, November 2006.
32. *Computation, Randomness and Beyond*, University of Bologna, Italy, November 2006.
33. *Natural Complexity, Partial Randomness and Zeta Functions*, Institut für Informatik, Universität Potsdam, Germany, October 2006.
34. *What Is the Halting Problem?*, Martin-Luther-Universität Halle-Wittenberg, Germany, October 2006. (Colloquium Lecture)
35. Inaugural lecture *Algorithmic Randomness and Quantum Randomness* to the stage-3 course *Statistical Mechanics II*, Technical University of Vienna, Austria, October 2006.
36. *What Is the Halting Problem?*, Masaryk University, Brno, Czech Republic, October 2006. (Colloquium Lecture)
37. *An Exercise in De-Quantisation*, Slovak Academy of Science, Bratislava, Slovakia, September 2006.
38. *Natural Complexity, Partial Randomness and Zeta Functions*, ‘Le Séminaire Complexité’ organised by Hervé Zwirn, IHPST (Sorbonne, Paris), France, September 2006.
39. *Complexity, Provability and Incompleteness*, University of the Witwatersrand, Johannesburg, South Africa, December 2005.
40. *Computing at the Speed of Light*, University of South Africa in Muckleneuk, Pretoria, South Africa, November 2005.
41. *Complexity, Provability and Incompleteness*, University of Capetown, Capetown, South Africa, November 2005.
42. *Complexity, Provability and Incompleteness*, University of South Africa in Muckleneuk, Pretoria, South Africa, November 2005.
43. *Computing at the Speed of Light*, Graz University of Technology, Austria, October, 2005. (Colloquium Lecture)
44. *Complexity, Provability, and Incompleteness*, Department of Mathematics, University of Rome “La Sapienza”, Rome, Italy, June 2005.
45. *Complexity, Provability and Incompleteness*, Department of Philosophy, Auckland University, April 2004.
46. *Fighting Complexity*, Black Sea University, Casa Titulescu, Bucharest, Romania, September 2004.
47. *From Uncertainty to Incompleteness via Randomness*, “S. Petersburg Seminar on Quantum Computing”, S. Petersburg, Russia, September 2004.
48. *From Uncertainty to Incompleteness via Randomness*, Joint Institute for Nuclear Research (JINR), Dubna, Moscow Region, Russia, September 2004.

49. *Computing a Glimpse of Randomness*, Monash University, Melbourne, Australia, June 2004.
50. *From Uncertainty to Incompleteness via Randomness*, Monash University, Melbourne, Australia, May 2004.
51. *From Uncertainty to Incompleteness via Randomness*, Victoria University, Melbourne, Australia, May 2004.
52. C. S. Calude, M. A. Stay. *From Uncertainty to Incompleteness via Randomness*, CDMTCS Seminar, Auckland University, April 2004.
53. *Passages of Proof*, Halle University, Germany, November 2003.
54. C. S. Calude, G. Păun. *Bio-Steps Beyond Turing Barrier*, Rovira i Virgili University, Tarragona, Spain, November 2003.
55. *Passages of Proof*, Rovira i Virgili University, Tarragona, Spain, October 2003.
56. *Dialogues on Quantum Computing*, Facultad de Informática, Universidad Politécnica de Madrid, Spain, October 2003.
57. *What Is Turing Halting Problem?*, Mathematical Institute, Belgrade, Serbia, October 2003. (Colloquium Lecture)
58. *Computing a Glimpse of Randomness*, Faculty of Science, University of Novi Sad, Serbia, October 2003.
59. *Passages of Proof*, Niš University, Niš, Serbia, October 2003.
60. *Computing a Glimpse of Randomness*, LITA, EA 3097, Université de Metz, France, September 2003.
61. *Paradoxes of Voting*, Computer Science Department of the Hong Kong University of Science & Technology, Hong Kong, September 2003.
62. *Computing a Glimpse of Randomness*, Centre for Mathematical Modelling, Universidad de Chile, Santiago, Chile, August 2003.

64. *What Is Turing's Halting Problem?*, Centre for Mathematical Modelling, Universidad de Chile, Santiago, Chile, August 2003.
65. *Passages of Proof*, CDMTCS Seminar, Auckland University, August 2003.
66. *What Is Turing's Halting Problem?*, Mathematischen Institut der Ludwig-Maximilians-Universität München, Germany, July 2003.
67. *Quantum Computing and Learning*, Romanian Academy, Bucharest, Romania, July 2003.
68. *What Is Turing's Halting Problem?*, Université de Bourgogne, Dijon, France, July, 2003.
69. *Passages of Proof*, Université de Bourgogne, Dijon, France, July, 2003.
70. *The Power and Limits of Classical Computing*, Quantum Optics Seminar, Auckland University, NZ, March 2003.
71. *Computing A Glimpse of Randomness*, Heidelberg University, Heidelberg, Germany, October 2002.
72. *Computing A Glimpse of Randomness*, Frankfurt University, Frankfurt, October 2002.
73. *A Quantum Attack on Undecidable Problems*, Kyoto Sangyo University, Kyoto, October 2002.

74. *Computing A Glimpse of Randomness*, University of Science and Technology, Hong Kong, July 2002.
75. *A Quantum Attack on Undecidable Problems*, “Ovidius” University of Constantța, Romania, July 2002.
76. *A Quantum Attack on Undecidable Problems*, Bucharest University, Romania, July 2002.
77. *Computing A Glimpse of Randomness*, Massey University at Albany, Auckland, June 2002.
78. *Gödel and Turing Revisited*, University of Western Ontario, Canada, March 2002.
79. *Randomness and Incompleteness*, Massey University, Palmerston North, NZ, November 2001.
80. *Randomness and Incompleteness*, University of Western Ontario, London, Canada, October 2001.
81. *Randomness and Incompleteness*, Queen’s University, Kingston, Canada, October 2001.
82. *Computably Enumerable Random Reals*, Canterbury University, Christchurch, NZ, July 2001.
83. *Randomness and Incompleteness*, Istituto Dalle Molle di Studi sull’Intelligenza Artificiale, Lugano, Switzerland, June 2001.
84. *Computing the Uncomputable*, “Ovidius” University of Constanța, Romania, December 2000.
85. *Computing the Uncomputable*, Bucharest University, Romania, November 2000.
86. *Real Numbers: From Computable to Random*, Rutgers University, USA, November 2000.
87. *Computably Enumerable Reals*, National University of Singapore, Singapore, July 2000.
88. *Chaitin Ω Numbers, Solovay Machines and Incompleteness*, Kyoto Sangyo University, Kyoto, Japan, December 1999.
89. *What Is Algorithmic Information ?*, Meijo University, Nagoya, Japan, October, 1999.
90. *Completeness, Decidability, Incompleteness*, Massey University at Albany, NZ, September, 1999.
91. *Recent Results on Chaitin Omega Numbers*, “Ovidius” University of Constanța, Romania, August 1999.
92. *The Incompleteness Phenomenon*, Halle University, Germany, July 1999.
93. *Recent Results on Chaitin Omega Numbers*, Halle University, Germany, July 1999.
94. *Recent Results on Chaitin Omega Numbers*, Open University, Hagen, Germany, July 1999.
95. *Quantum Correlations Conundrum: An Automaton-Theoretic Approach*, International Solvay Institutes, Brussels Free University, Brussels, Belgium, June 1999.
96. *Recent Results on Chaitin Omega Numbers*, Institut für Theoretische Physik, Technischen Universität Wien, Austria, June, 1999.
97. *Understanding Quantum Correlations via Automata*, National Sandia Laboratories, Albuquerque, USA, April 1999.
98. *C.E. Reals: Complexity and Randomness*, The Santa Fe Institute, Santa Fe, USA, April 1999.
99. *Recent Progress on the Complexity of C.E. Reals*, Department of Computer Science, University of New Mexico, Albuquerque, USA, April 1999.
100. *Recent Progress on the Complexity of C.E. Reals*, Department of Mathematics and Computer Science, University of Massachusetts at Boston, USA, April 1999.

101. *Recent Progress on the Complexity of C.E. Reals*, Department of Mathematics, Cornell University, USA, April 1999.
102. *Recent Progress on the Complexity of C.E. Reals*, Department of Computer Science, Rochester University, USA, April 1999.
103. *A Characterization of C.E. Random Reals*, Department of Mathematics, University of Chicago, USA, February 1999.
104. *Recent Progress on the Complexity of C.E. Reals*, Department of Mathematics, University of Chicago, USA, February 1999.
105. *Recursively Enumerable Reals: Computability, Complexity and Randomness*, Department of Computer Science, University of California at San Diego, USA, December 1998.
106. *Recursively Enumerable Reals: Computability, Complexity and Randomness*, Berkeley Logic Colloquium, University of California at Berkeley, USA, November 1998.
107. *The Halting Problem and the Mathematical Practice*, Logic Group Seminar, Bucharest University, Romania, November, 1998.
108. *Recursively Enumerable Reals: Computability, Complexity and Randomness*, Department of Computer Science, Birmingham University, UK, October 1998.
109. *Finite Automata: Complementarity, Simulation, Universality*, Department of Computer Science, Birmingham University, UK, October 1998.
110. *The Computing Cell*, Department of Computer Science, Birmingham University, UK, October 1998.
111. *Why Do We Believe in God? Three Non-Theological Arguments*, Logic Group Seminar, Bucharest University, Romania, July, 1998.
112. *Symbolic Dynamics: Complexity, Entropy, Randomness*, International Solvay Institutes, Brussels Free University, Brussels, Belgium, June 1998.
113. *Complexity, Randomness, Independence and the Brain*, Institute of Mathematics, Academia Sinica, Taipei, Taiwan, June 1998.
114. *Recursively Enumerable Reals: Computability, Complexity, Randomness*, Department of Mathematics, Turku University and Turku Centre for Computer Science, Turku, Finland, March, 1998.
115. *Automata as Toy Models for Uncertainty*, “Séminaire Complexité”, Université Paris Sud, Orsay, France, February, 1998.
116. *Recursively Enumerable Reals: Computability, Complexity, Randomness*, Bucharest University, Romania, February, 1998.
117. *The Cost of Forgetting: Quantum Computation*, Romanian Academy, February, 1998 (plenary address to the Academy).
118. *Reversible Computation*, University “Dunărea de Jos”, Galați, Romania, February, 1998.
119. *New Trends in the Theory of Computation*, National College “V. Alecsandri”, Galați, Romania, February, 1998.
120. *A Brief Excursion in Algorithmic Information Theory*, Babeş-Bolyai University, Cluj, Romania, April, 1997.
121. *Automata for Physics*, Department of Mathematics, University of Turin, Italy, April, 1997.
122. *Some Applications of Automata to Physics*, Informal & Colloquial Talks, Department of Mathematics, University of Auckland, April, 1997.

123. *A Brief Excursion in Algorithmic Information Theory*, University of Chicago, USA, January 1997.
124. *Minimal Universal Automata*, Institute for Theoretical Physics, Technical University of Vienna, Austria, January 1997.

141. *Randomness as an Invariant for Number Representations*, Victoria University of Wellington, NZ, August, 1994.
142. *Computability and Information*, Victoria University of Wellington, NZ, August, 1994.
143. *Computability and Information*, Massey University, Palmerston North, NZ, August, 1994.
144. *The Incompleteness Phenomenon: From Gödel to Chaitin*, Institute for Theoretical Physics, Technical University of Vienna, Austria, June, 1994.
145. *Unimedia: An Overview*, “Ovidius” University of Constanța, Romania, May, 1994.
146. *Statistics and Communication*, Black Sea University, Mangalia, Romania, May, 1994.
147. *Information and Randomness: An Overview*, University of Bucharest, Romania, February, 1994.
148. *Baire Category Classification in Abstract Complexity Theory*, Seminario Matematico dell’ Università e del Politecnico di Torino (Direttore: Professor Sergio Benenti), University of Turin, Italy, January, 1994.
149. *Information and Randomness—An Overview*, University of Turin, Italy, January, 1994.
150. *Borel Normality and Algorithmic Randomness*, Cornell University, Ithaca, USA, November, 1993.
151. *Invariants for Number Representations*, University of Toronto, Canada, October, 1993.

152. *Invariants for Number Representations*, University of Western Ontario, London, Canada, October, 1993.
153. *Fermat's Last Theorem*, Romanian Academy, Romania, July, 1993.
154. *Mathematics, from Axiomatics and Algorithmics to Experimental*, Bucharest University, Romania, July, 1993.
155. *Randomness as a Universal Invariant*, Auckland University, June, 1993.
156. *Randomness as a Universal Invariant*, University of Waikato, Hamilton, NZ, May, 1993.
157. *Three Theories of Computational Complexity*, University of Waikato, Hamilton, NZ, May, 1993.
158. *Topological Methods in Complexity Theory*, University of Waterloo, Canada, November, 1992.
159. *Random Sequences and Strings*, Hamburg University, Germany, June, 1991.
160. *Random Strings and Sequences*, Turku University, Finland, April, 1991.
161. *A Topological Analysis of Gödel Independent Statements*, Turku University, Finland, April, 1991.
162. *Random Strings and Sequences*, University of Western Ontario, London, Canada, April, 1990.
163. *Algorithmic Randomness*, Wesleyan University, Connecticut, USA, April, 1990.
164. *Complexity as a Source of Randomness*, Bucharest University, Romania, November, 1988.
165. *Gödel's Theorem: A Limit of Formalization ?*, Institute of Atomic Physics, Măgurele, Romania, October, 1984.
166. *Kolmogorov Complexity and Applications*, Babeş-Bolyai University, Cluj, Romania, June, 1980.

5.13 Post-Doctoral Fellows

1. Dr. Richard Coles, research in *Algorithmic Information Theory*, March 1998 – May 1999.
2. [Prof. Peter Hertling](mailto:hertling@informatik.uni-duisburg.de) (hertling@informatik.uni-duisburg.de), research in *Algorithmic Information Theory*, November 1996 – August 1998. Peter has got a visiting position with the Institute of Mathematics, Berkeley University, USA (6 months), then he returned to Hagen Open University, Germany and currently a professor at Institut für Theoretische Informatik und Mathematik Fakultät für Informatik Universität der Bundeswehr München, Germany.
3. [A/Prof. Yongge Wang](mailto:ywang@certicom.com) (ywang@certicom.com), research in *Algorithmic Information Theory*, February 1997 – December 1997. After working at Certicom Research Certicom Corp., USA, Yongge is an associate-professor at the University of North Carolina at Charlotte, USA.
4. Dr. Marjo Lipponen (marlip@utu.fi), research in the *Theory of Automata and Applications to Quantum Mechanics and Quantum Computation*, March 1997 – March 1998. Marjo has got an assistant professorship position with the Department of Mathematics, Turku University, Finland.

5.14 Research Seminars

1. *Complexity Theory*, Bucharest University, Romania, 1980–1992.
2. (jointly with B. Doran), *DNA Computation*, University of Auckland, NZ, 1995–1996.
3. (jointly with B. Pavlov), *Dynamical Systems*, University of Auckland, NZ, 1997.

5.15 Consulting

Computer Science (Artificial Intelligence, Education), CEPES, UNESCO, Romania, 1988–1992. *Electronic publishing (J. UCS Project)*, Springer-Verlag, Germany, 1994–1995. *Web design and e-commerce*, Pukekohe Travel, NZ, 1997 on.

5.16 Interviews

1. Denise Theodoru. [Romanians in the World](#), Radio Romania Actualități, 21 April 2012. (in Romanian)
2. Marian Baroni. “Not too many jobs pay for doing what you like: mathematicians are. An interview with C. S. Calude” *Revista de Matematica din Galați* 34 (2010), 1–6. (in Romanian)
3. Mikey Havoc. “Ready, Steady, Learn” about limits of computation with Professor Cristian Calude, 95BFM, Auckland, New Zealand, 9 December 2008.
4. Helen Broome. Talk about Omega,⁹ Elam School of Fine Arts, University of Auckland, 14 November 2008.
5. About a meeting: Mirror interview¹⁰ with Cristian Calude and Solomon Marcus, *Romania—View over the Top*, 12 October 2008, 88–96. (in English and Romanian)
6. Vlad Mixich. [Interview with mathematician Cristian Calude](#), *Hotnews*, April 2008. (in Romanian)
7. Interviewed by the Radio Romania International (interviewer: Mihaela Dincă) in the series “Romanian Personalities”. Broadcast: 17 September 2006. (in Romanian)
8. Interview *Taxicab Numbers*, Radio BBC, Rome, Italy, (interviewer: Adrian Washbourne). Broadcast: 23 September 2005.
9. Half-an-hour live interview *Quantum Computing*, “Romania Tomorrow TV Channel”, Bucharest, Romania (interviewer: C. Român), 9 June 2005. (in Romanian)
10. Interview *The Centre for Discrete Mathematics and Theoretical Computer Science?*, “Romanian Television”, filmed in Auckland, August 2004 (interviewer: A. Mironov, in Romanian).
11. One-hour live interview *From Quantum Mechanics to Quantum Computing*, “Romania Tomorrow TV Channel”, Bucharest, Romania, July 2004 (interviewers: A. Mironov and C. Român, in Romanian).
12. E-books and electronic publishing, *Romania International Radio*, 28 October 2002 (interviewer: Andreea Demirgian) (in Romanian).
13. Reality vs virtual reality, *Romania International Radio*, 18 October 2001 (interviewer: Denise Theodoru) (in Romanian).
14. NZ today, *Romania Radio 1*, 11 July 2001 (interviewer: Mihael Ghiță) (in Romanian).
15. Social conflicts, interview prepared for the Seminar *Possible Conflicts in the World*, *Romania International Radio*, 22 May 2001 (interviewer: Andreea Demirgian) (in Romanian).
16. Questions for the 21st Century: Online discussion with C. S. Calude, D. Chițoran (Unesco, Paris), M. Malița (Romanian Academy, Bucharest) and V. Nemoianu (The Catholic University of America, Washington DC), *Romania International Radio*, 19 January 2001 (moderator: Denise Theodoru) (in Romanian).
17. Profesorul Cristian S. Calude has got a Ph.D. in mathematics at 25, [Viața Liberă, The Cultural Page](#), 30 November 2000, (interviewer: Nicoleta Crânganu). (in Romanian)

⁹Part of H. Broome’s BA presentation.

¹⁰All questions have been answered independently by both interviewees.

18. D. S. Bridges and C. S. Calude. Constructive mathematics, *Romania Radio 1*, 30 August 1999 (interviewer: C. Mihăilescu) (in Romanian).
19. An interview with Professors D. S. Bridges and C. S. Calude, *MegaTV and ExpressTV, Galați*, 26 August 1999 (interviewer: L. Șerbănescu) (in Romanian).
20. Reinventing the computer, *Radio NZ*, 27 July 1998 (interviewer: J. Reynolds).
21. D. King. Scientists ponder future development of computers, *NZ InfoTech Weekly*, January 1998.
22. A. Gifford. Boffins seek quantum leap forward, *NZ Herald* 14 January 1998.
23. R. Keenan. When a computing conference departs from the norm, *Computerworld NZ* 30 June (1997), 10.
24. An interview with Professor Cristian Calude (interviewer: Irina Athanasiu), *PC Report*, 51 (1996), 18–20. (in Romanian)
25. An interview with Professor Cristian Calude (interviewer: M. Jalobeanu), *PC Report*, 34 (1995), 16–17. (in Romanian)

5.17 Research Impact

Cited in more than 3500 papers and 100 books by more than 550 authors including:

5.18 Selected Parts from Reviews and Other Opinions

1. “During a visit to New Zealand, Cris Calude in Auckland introduced me to algorithmic information theory, a subject on which he had just finished a book. We wrote a paper showing that a set truth-table above the halting problem is not Martin-Löf random... I also learned about Solovay reducibility ... ” From A. Nies. *Studying randomness through computation*, in H. Zenil (ed.). *Randomness Through Computation*, World Scientific, Singapore, 2011, p. 207.
2. “1993 was also the year when I met Cris Calude first. He was the one who draw my attention from the mere interest in the amount of information to questions related with randomness... From that time we met more and more often which resulted in a fruitful cooperation.” From L. Staiger. *From error-correcting codes to algorithmic information theory*, in H. Zenil (ed.). *Randomness Through Computation*, World Scientific, Singapore, 2011, p. 294.
3. “Though we did not know it at the time, this book’s genesis began with the arrival of Cris Calude in New Zealand. Cris has always had an intense interest in algorithmic information theory. The event that led to much of the recent research presented here was the articulation by Cris of a seemingly innocuous question. This question goes back to Solovay’s legendary manuscript [371], and Downey learned of it during a visit made to Victoria University in early 2000 by Richard Coles, who was then a postdoctoral fellow with Calude at Auckland University. In effect, the question was whether the Solovay degrees of left-computably enumerable reals are dense.

At the time, neither of us knew much about Kolmogorov complexity, but we had a distinct interest in it after Lance Fortnow’s illuminating lectures [148] at Kaikoura in January 2000.

After thinking about Calude’s question for a while, and eventually solving it together with André Nies [116], we began to realize that there was a huge and remarkably fascinating area of research, whose potential was largely untapped, lying at the intersection of computability theory and the theory of algorithmic randomness.” From the Preface to R. Downey, D. Hirschfeldt. *Algorithmic Randomness and Complexity*, Springer, Heidelberg, 2010, p. xiv.

4. The paper “C. S. Calude. Chaitin Ω numbers, Solovay machines and incompleteness, *Theoret. Comput. Sci.* 284 (2002), 269–277” was in ‘top 25 of most downloaded *Theoretical Computer Science* articles in April – August 2002’.
5. The paper “C. S. Calude, M. A. Stay. From Heisenberg to Goedel via Chaitin” was in the CERN’s list of most downloaded papers of year 2004.
6. On the second edition of the book *Information and Randomness*, 2002:

D.S. Bridges (from the book back cover): “Professor Calude has produced a first-rate exposition of up-to-date work in information and randomness.”

G.J. Chaitin (from the book ‘Foreword’): “This book, benefiting as it does from Cristian Calude’s own research in *AIT* and from his experience teaching *AIT* in university courses around the world, has helped to make the detailed mathematical techniques of *AIT* accessible to a much wider audience. This vastly expanded second edition collects in one place much exciting recent work of its author and others, and offers leisurely discussions of applications to philosophy and physics. I am sure that it will be even more successful and influential than the first edition.”

A. Salomaa (from the book ‘Foreword by the Editor’): “The vigorous growth in the study of algorithmic information theory has continued during the past few years, which is clearly visible in the present second edition. Many new results, examples, exercises and open problems have been added. The additions include two entirely new chapters: “Computationally Enumerable Random Reals” and “Randomness and Incompleteness”. The really comprehensive new bibliography makes the book very valuable for a researcher. The new results about the characterization of computably enumerable random reals, as well as the fascinating Omega Numbers, should contribute much to the value of the book as a textbook. The author has been directly involved in these results that have appeared in the prestigious journals *Nature*, *New Scientist* and *Pour la Science*.”

K. Svozil (from the book back cover): “This book is a must for a comprehensive introduction to algorithmic information theory and for anyone interested in its applications in the natural sciences.”

S. Rao (*Computing Reviews*, April 2003): “This book by Calude is the second edition of a very useful 1994 monograph on AIT. It includes new content, deriving from the work of Solovay, Chaitin, and the author himself, and also includes an updated bibliography.”
7. Stephen Wolfram: “As I’m sure you know, I’ve made quite an effort to do explicit studies of properties of simple programs. I particularly applaud your efforts along similar lines.” (Email 4 Dec 2002).
8. M. Chown (3 July 2002): “Omega may be uncomputable but one man has computed the uncomputable. His name is Cristian Calude, and has calculated the first 64 bits of Omega. Omega is like a sacred text. Its few thousand bits contain the enaswers to more mathematical questions than can be written down in the entire universe.”
9. M. Chown (Smash and grab, (Feature Story) *New Scientist* 6 April (2002), p. 24): “A daring assault on the very bounds of mathematics could bring back treasures we thought were forever beyond our reach. Get ready to know the unknowable.”
10. J.-P. Delahaye (Les nombres oméga, *Pour la Science*, 292 May (2002), 102): “. . . connaître les chiffres d’une machine universelle U à programmes autodélimités précise qui n’a pas été construite de manière adéquate pour avoir des chiffres connus à l’avance est réellement une tâche difficile, car Ω_U contient alors sous forme concentrée l’information sur l’arrêt des programmes de U . Peut-on tenter de calculer quelques chiffres d’un tel Ω_U ? Oui et c’est ce qu’ont fait récemment C. Calude, M.J. Dinneen et C.K. Shu.”

11. J.-P. Delahaye (La barrière de Turing, *Pour la Science*, 312 October (2003), 95): “Presque simultanément Tien Kieu, d’une part, Cristian Calude et Boris Pavlov d’autre part, ont décrit des mécanismes quantiques franchissant—en théorie—la barrière de Turing, c’est à dire résolvant en temps fini des problèmes demandant classiquement des calculs infinis.”
12. “Ages ago, . . . we agreed that it would be ok if very rarely we would mention interesting books, that are not directly related to programming languages, but may interest LtU readers none the less. Well, I decided to mention this book *Computing with Cells and Atoms*”. Review by Ehud Lamm in the [The Programming Languages Weblog](#), 2002.
13. R. M. Baer (review of *Computing with Cells and Atoms*, MR 2002e:68020): “The book is a well-produced paperback, the font is sharp and sensible, and the figures are nicely drawn. . . . On the whole, the book nicely serves its declared intent, and the ”mathematically educated layman” who reads it and follows its leads will learn more than just a glimpse of many of its topics.”
14. M. Ferbus-Zanda, S. Grigorieff (Is randomness “native” to computer science? *Bull. Eur. Assoc. Theor. Comput. Sci.* 74 (2001), p. 111): “Calude, Hertling, Khossainov and Wang, 1998 (cf. also Kučera and Slaman, 2001) proved a very beautiful result: r is a Chaitin Ω real if and only if (the binary development of) r is Martin-Löf random and recursively enumerable from below. . . .”
15. J. Casti (*Five More Golden Rules: Knots, Codes, Chaos, and Other Great Theories of 20th-Century Mathematics*, Wiley, New York, 2000, p. 262): “Calude, C. Information and Randomness. Berlin, Springer-Verlag, Heidelberg, 1994. Extremely clear monograph on algorithmic information theory. Contains discussion of some interesting philosophical questions surrounding the meaning of ‘randomness,’ as well as notion of randomness in physics and the information content of mathematical knowledge.”
16. ‘. . . although mathematics and physics are different, it is more a matter of degree than black and white.’ This is from a piece entitled “Randomness Everywhere” in the July 22, 1999 *Nature*, by C. S. Calude and Greg Chaitin. They explain recent results in algorithmic information theory due to Calude and to Theodore Slaman of U. C. Berkeley, building on earlier work of Chaitin and Robert Solovay. “This work reinforces the message of algorithmic information theory that randomness is as fundamental and pervasive in pure mathematics as it is in theoretical physics.” Get ready for experimental mathematics.’ (from *Math in the Media* 10–1999). The paper was also summarized by [Allyn Jackson](#).
17. Denis R. Hirschfeldt (MR 1 923 902) “In this paper, the author extends Solovay’s result by proving the following theorem. Let α be a c.e. 1-random real with binary expansion $0.a_0a_1a_2\dots$, and let n be such that $a_i = 1$ for $i < n$ and $a_n = 0$. Then there is a self-delimiting machine U such that PA proves that U is universal and $\Omega_U = \alpha$, but ZFC cannot prove any statement of the form “the i th bit of the binary expansion of Ω_U is k ” for $i \geq n$. This is the best possible result in this direction, since ZFC can always prove that the i th bit of the binary expansion of Ω_U is 1 for all $i < n$.”
18. V. Ya. Kreinovich (MR 2000f:03185) “The implicit function theorem and the related inverse function theorem are important tools in nonlinear mechanics; for example, these theorems are used to define a canonical transformation of a dynamical system to a form in which periodic orbits are explicit. However, traditional proofs of these theorems are not constructive: they are pure existence proofs, which do not describe algorithms for computing the implicit or the inverse function. In principle, it is possible to modify the existing proofs and provide the desired algorithms, but since the original proofs were not intended to be algorithmic, the resulting algorithms are overly complicated. To make the corresponding algorithms more practically useful, the authors provide a completely new constructive proof for the implicit function theorem.”
19. O. Sparrow, [AI Philosophy Forum, 1999/07/27](#): “The *Nature News and Views* paper of 22 July 1999, pp 319–320 is interesting. They show that randomness is as deeply embedded in mathematics as in physics, and perhaps finally kill the issues of computability and reductionism.”

20. J. Collier (Information. *Stanford Encyclopedia of Philosophy*, 1999: “Calude (1994) is a basic text on information and randomness.”
21. M. Davis. FOM, *London Review of Books: letters about Sokal–Bricmont*, 1999: “Cristian Calude [is] a reputable computer scientist whose work has to do with the Chaitin–Martin–Löf theory of randomness.”
22. M. I. Dekhtyar (review of *Information and Randomness*, MR 96d:68103): “The author selected for the book the theory of random strings and sequences, which is the basic part of AIT, combining theoretical recursive and probabilistic reasoning. The theory is presented with respect to strings in an arbitrary (Q letters) alphabet which provides more general results than in the classical binary case. . . . The extensive bibliography includes more than 250 items. All the basic chapters are followed by exercises and problems and by a history of results. The book is clearly written, self-contained and coherent and may be recommended as a textbook for graduate students in computer science.”
23. J. P. Helm (review of *Theories of Computational Complexity*, MR 89g:03057): “This is a book for professionals in the field of computability theory. Its goal is to present, in mathematically rigorous fashion, four different machine-independent theories of computational complexity. Although the book is essentially self-contained, it assumes a high degree of mathematical sophistication on the part of the reader.”
24. A. Leitsch (review of *Theories of Computational Complexity*, Zbl 0633.03034): “This book represents wide areas of abstract complexity theory, or rather ‘theories’ as the title suggests. The areas discussed in the book, each of them representing another concept of complexity, are the following ones: Subrecursive hierarchies, Blum’s complexity theory, Kolmogorov’s complexity theory and Martin–Löf’s complexity theory. . . . The material is presented at a high level and contains many results of recent research (partly from the author himself). The point of view of the presentation is rather a mathematical than a computational one (no machine models for computation).”

6 Teaching¹¹

6.1 Undergraduate Courses

Introduction to Programming, Mathematical Linguistics, Assembler Programming, Discrete Mathematics, Introduction to Computing I, Algebra for Computer Science, Formal Languages and Automata, General Topology, Programming Techniques, Elementary Mathematical Logic, Theory of Programming Languages, Data Structures and Algorithms, *Computers in Juridical Sciences*, *Theory of Algorithms*, Introduction to Computing II, *Recursive Function Theory*, *Computational Complexity*, *Constructive and Computer Algebra*, *Constructive Analysis*, History of Mathematics, Complexity of Parallel Computation, Automata Theory, *Descriptive Complexity*, Model Theory (Bucharest University, Bucharest, Romania, 1975–92), Introduction to Computing I, *Topology and Logic* (Hyperion University, Bucharest, Romania, 1991–2), Mathematical Foundations of Computer Science, Design and Analysis of Algorithms, Algorithmics, Mathematical Logic, History of Computing and Computers, Data Communications Fundamentals (University of Auckland, NZ, 1993–2011).

6.2 Graduate Courses

Topological and Categorical Methods in Computer Science, Advanced Functional Programming, *Logic for Computer Science*, *Advanced Computation Theory*, *Advanced Computational Complexity*, *Kolmogorov and Chaitin Complexity Theories*, *Models of Brain Behaviour*, Constructive Measure Theory, *Algorithmic Randomness*, *Incompleteness Theory* (Department of Computer Science, Hyperion University, Bucharest, Romania, 1975–92), *Algorithmic Information Theory (Complexity Theory)* (University of Western Ontario, London, Canada, Fall 1992), *Truths and Proofs, Algorithmic Information Theory*, *Unconventional Models of Computation*, Computational Complexity (University of Auckland, NZ, 1993–2001), *Chaitin Complexity* (Bucharest University, Romania, Fall 1994),

¹¹Courses I have created will be emphasised.

Information Theory (Technical University of Vienna, Summer 1999), *Algorithmic Information Theory* (JAIST, Japan, Fall 1999), *Randomness Everywhere: Computably Enumerable Reals and Incompleteness* (Universidad de Buenos Aires, Argentina, Summer 2000), *Quantum Computing* (“Ovidius” University of Constanța, Romania, Fall 2000–1), *Quantum Computing* (Rovira i Virgili University, Tarragona, Spain, Fall 2002), *Introduction to Research in Computer Science* (University of Auckland, NZ, 2004), *Complexity, Proofs and Physics* (Third Valparaiso Summer School on “Complex Systems, Theoretical Informatics & Systems Biology”, The Valparaiso Institute of Complex Systems, Valparaiso, Chile, 2005), *Natural Halting Probabilities, Partial Randomness, and Physics* (Fourth Valparaiso Summer School on “Theoretical Computer Science, Ecology & Cognitive Science”, The Valparaiso Institute of Complex Systems, Valparaiso, Chile, January 2006), *Algorithmic Information Theory: A Personal Perspective* (Istanbul Bilgi University, Turkey, May 2006).

6.3 Textbooks and Lecture Notes

1. C. Calude. *Algorithmic Information Theory, Lecture Notes*, University of Western Ontario, London, 1992, 42 pp.
2. C. Calude. *Introduction to Computing. Lecture Notes for Mathematics Teachers*, Bucharest University, Bucharest, 1988, 42 pp. (in Romanian)
3. C. Calude. *Theory of Algorithms. Recursiveness, Complexity and Constructivity*, Bucharest University, Bucharest, 1987, 197 pp. (first edition), 1988, 208 pp (second edition). (in Romanian)
4. C. Calude, V. E. Căzănescu. *Introduction to Computing. Mathematical Logic Lecture Notes*, Bucharest University, Bucharest, 1984, 96 pp. (in Romanian)
5. C. Calude. *Introduction to Computing. Laboratory Themes*, Bucharest University, Bucharest, 1982, 66 pp. (in Romanian).

6.4 PhD Students

1. Tania Roblott (trob048@aucklanduni.ac.nz). *Finite-State Incompressibility and Applications*, University of Auckland. (co-supervised with Bakh Koussainov).
2. Alastair Abbott (aabb009@aucklanduni.ac.nz). *Incomputability and Randomness in Physics*, University of Auckland and École Polytechnique, Paris (co-supervised with Giuseppe Longo).
3. Mike Stay (metaweta@gmail.com). *Higher Category Theory of Computation and some Relationships with Physics*, University of Auckland. (co-supervised with John Baez).
4. Hector Zenil C. (hectorz@wolfram.com). *Une Approche Expérimentale à la Théorie Algorithmique de la Complexité*, Lille 1 University, France. (co-supervised with Jean-Paul Delahaye)
5. Joshua J. Arulanandham (dhay049@ec.auckland.ac.nz). *Natural Algorithms: A New Theory of Computation*, University of Auckland, NZ, 2005. (co-supervised with M.J. Dinneen) He is a professor at the Sri Krishna College of Engineering and Technology, India.
6. Chi-Kou Shu (chikou.shu@gmail.com). *Computing Exact Approximations of a Chaitin Omega Number*, University of Auckland, NZ, 2004. (co-supervised with M.J. Dinneen) He is an assistant professor at China University of Technology, Taipei, Taiwan.
7. Cristian Grozea (chrisg@phobos.ro). *Contributions to Algorithmic Information Theory*, Bucharest University, Romania, 2003. Researcher at Fraunhofer FIRST, Berlin, Germany.¹²
8. Luminița Viță (L.Vita@math.canterbury.ac.nz). *Recursive-Theoretical Methods in Algebra*, Bucharest University, Romania, 2002. In 2000 Luminița has got a Ph.D. Degree with the Thesis *Constructive Theory of Operator Algebras*, at University of Canterbury, NZ under the supervision of Professor D.S. Bridges. Luminița is a research manager with AC Nielsen, Wellington, NZ.

¹²Cristian won the 1st International Competition on Plagiarism Detection <http://www.uni-weimar.de/medienn/webis/research/workshopseries/pan-09/competition.html>.

9. Asat Arslanov (sascokid@gmail.com). *Contributions to Algorithmic Information Theory*, University of Auckland, NZ, 1998. The Thesis was awarded the *Montgomery Memorial Prize*. He is a senior analyst in risk management with ANZ National, Wellington, NZ.
10. Cezar Câmpeanu (cezar@sun11.math.upei.ca). *Topological Methods in Complexity Theory*, Bucharest University, Romania, 1995. He has currently an associate professorship with Prince Eduard Island University, Charlottetown, Canada.
11. Ileana Streinu (streinu@cs.smith.edu). *Grammatical Inference*, Bucharest University, Romania, 1994. (co-supervised with S. Marcus and Gh. Păun) Ileana has got a Ph.D. degree in Computer Science, Rutgers University, USA, 1994. She has currently a professorship position with Smith College, Massachusetts, USA.
12. Marius Zimand (mzimand@saber.towson.edu). *Positive Relativizations and Baire Classification*, Bucharest University, Romania, 1991. He has got a Ph.D. in Computer Science from the University of Rochester, USA, 1996. Marius holds an associate-professorship position with Towson University, Towson, USA.
13. Mihaela Malița (mmalița@smcm.edu). *Learning Processes in Artificial Intelligence*, Bucharest University, Romania, 1990. (co-supervised with S. Marcus) She has currently a senior lectureship position with Saint Anselm College, Manchester, New Hampshire, USA.
14. Șerban Buzeteanu. *Degrees of Effectivity in Computation Theory: Recursive, Analytical and Combinatorial Aspects*, Bucharest University, Romania, 1988. (co-supervised with S. Marcus and I. Tomescu) He had (until his death in November 1994) a senior lectureship position with Bucharest University.
15. Nelu Dima (Nelu.DIMA@RRZ-WIEN.raiffeisen.at). *Contributions to Recursive Function Theory*, Bucharest University, Romania, 1986. (co-supervised with C. Popovici) He has a got a position with BEKO “Die Computer Leute”, Vienna, Austria.
16. M. Tătărăm (tataram@funinf.cs.unibuc.ro). *Logical, Analytical and Generative Models in the Study of Languages*, Bucharest University, Romania, 1984. (co-supervised with S. Marcus and Gh. Păun). Associate-professor at Bucharest University.

6.5 Masters Students

1. M. Fowler. *Simulation and Bounds of Finite-State Complexity*, Honours Thesis, University of Auckland, NZ, 2012.
2. A. Wilson. *Primality and Tests of Randomness*, Honours Thesis, University of Auckland, NZ, 2012.
3. J. Bax. *A Framework for Formal Proofs in Algorithmic Information Theory*, Honours Thesis, University of Auckland, NZ, 2011.
4. Ali Akhtarzada (ali.akhtarzada@gmail.com) *Wiki Ratings: Algorithms, Design and Architecture*, MSc, University of Auckland, NZ, 2010. (co-supervised with J. Hosking)
5. Sonny Datt (ndat001@aucklanduni.ac.nz) *Membrane Computing*, MSc, University of Auckland, NZ, 2010. (co-supervised with M. Dinneen)
6. Alastair Abbott (aabb009@aucklanduni.ac.nz) *Quantum Randomness*, MSc, University of Auckland, NZ, 2010.
7. Tania Roblot (trob048@aucklanduni.ac.nz). *Finite-state Descriptive Complexity*, MSc, University of Auckland, NZ, 2010. (co-supervised with M. Dinneen)
8. Alastair Abbott (aabb009@aucklanduni.ac.nz) *De-quantisation in Quantum Computing*, Honours Thesis, University of Auckland, NZ, 2009.
9. Liam Fearnley (lfea003@aucklanduni.ac.nz). *On Accelerated Turing Machines*, Honours Thesis, University of Auckland, NZ, 2009.

10. Tania Roblot (trob048@aucklanduni.ac.nz). *Finite-state Descriptive Complexity*, Honours Thesis, University of Auckland, NZ, 2009. (co-supervised with A. Nies)
11. Nicholas Hay (nickjhay@gmail.com). *Universal Semimeasures: An Introduction*, University of Auckland, NZ, 2007. (co-supervised with A. Nies)
12. Michael A. Stay (metaweta@gmail.com). *Truth and Light: Physical Algorithmic Randomness*, University of Auckland, NZ, 2005. Michael works for Google (Mountain View, Ca).
13. Terrence Wilson Johnson (tjoh018@ec.auckland.ac.nz). *Finding the Shortest Average Path Lengths in Kleinberg's Small World Model*, University of Auckland, NZ, 2005. (co-supervised with M. Dinneen)
14. Simona Dragomir (simona@easynet.ro). *An Interpreter for Register Machine Programs*, "Ovidius" University of Constanța, Romania, 2002. (co-supervised with M. Dinneen). Simona works for Datasys Prosoft in Bucharest, Romania, www.datasys.ro/.
15. Qinghui Zeng (Alex.Zeng@justice.govt.nz). *Randomness as an Invariant for Number Representations*, University of Auckland, NZ, 2000. He has got a programming position with the Ministry of Justice, Wellington, NZ.
16. Peiming Liang (pmliang@hotmail.com). *Randomness and Cellular Automata*, University of Auckland, NZ, 2000. He has got a position with an IT company in Parramatta, Australia.
17. Margaret Ng (margaretckng@hotmail.com). *A Metric Lexical Analysis*, University of Auckland, NZ, 2000. Margaret has got a teaching position with the Deakin University, Melbourne, Australia.
18. Terry Chiu (terry@ns1.mit.edu.tw). *Testing Computational Complementarity For Finite Automata Using Distributed Object Technology*, University of Auckland, NZ, 1999. (co-supervised with E. Calude and R. Nicolescu) Terry has a position with Mingchi Institute of Technology, Taipei, Taiwan.
19. Yongyi Hu. *Information-Theoretic Incompleteness*, University of Auckland, NZ, 1998.
20. Gordon Alford (gordon@cs.utu.fi). *DNA Computation: From Turing Machines to H Systems*, University of Auckland, NZ, 1997. He is currently a Ph.D. student in Computer Science with TUCS, Turku University, Finland.
21. Shane Legg (shane@vetta.org). *Solomonov Induction and Algorithmic Information Theory*, University of Auckland, NZ, 1996. After working for "Intelligenesis Corporation" (New York) for "Adaptive Intelligence" (Los Angeles), he was admitted as a Ph.D. student at IDSIA, Lugano, Switzerland (April 2004). Post-doc at University College London, UK.
22. Ion Măndoiu (ion@enr.uconn.edu). *An Extension of Gács Reducibility Theorem*, Bucharest University, Romania, 1992. He has a Ph.D. in Computer Science, Georgia University, USA, 1999. Associate-Professor University of Connecticut, USA.
23. Ion Macarie (macarie@metamorsw.com). *Applications of Chaitin Complexity to Software Engineering*, Bucharest University, Romania, 1991. He has got a Ph.D. degree in Computer Science, University of Rochester, USA, 1994. He has a position with Millennium Computer Corp., Rochester, USA.
24. Nicolae Duță (dutanico@bbn.com). *Representable P. Martin-Löf Tests*, Bucharest University, Romania, 1991. He has got a Master Degree in Applied Mathematics, Université Paris-Sud, France, 1994 and a Ph.D. in Computer Science, Iowa State University, USA, 2000. Currently he works for Microsoft, Boston, USA.
25. Ana-Maria Sălăgean. *Kraft-Chaitin Inequality and Applications in Computer Algebra*, Bucharest University, Romania, 1989. She has got a Ph.D. degree in Computer Science from RISC, Johannes Kepler University, Austria. Ana-Maria is currently with the Computer Science Department, Loughborough University, UK.

26. Eva Kurta. *An Extension of Kraft–Chaitin Theorem*, Bucharest University, Romania, 1989.
27. Cezar Câmpeanu. *Variants of Post Correspondence Problem*, Bucharest University, Romania, 1988.
28. Marius Zimand (mzimand@saber.towson.edu). *Complexity of Probabilistic Algorithms*, Bucharest University, Romania, 1983. (co-supervision with D. Vaida)
29. Valentin Vieru (ivr_cti@yahoo.com). *Recursion and Iteration. Efficient Translations*, Bucharest University, Romania, 1981. He is currently with Canada Computers, Toronto, Canada.
30. Brâduşa Fântâneau. *Recursive and Non-Primitive Recursive Functions*, Bucharest University, Romania, 1978.

6.6 Other Graduate Supervision

1. Jonathan Conder (j.conder@aucklanduni.ac.nz). *Quantum Randomness*, University of Auckland, NZ, 2011–12 (summer research fellowship).
2. Melissa S. Queen (Dartmouth College, NH USA). *Complexity of Mathematical Problems*, University of Auckland, NZ, 2011–12 (with E. Calude) (summer research fellowship).
3. Ali Akhtarzada. *A Framework for a Decentralized Ranking System*, University of Auckland, NZ, 2008–9. (with J. Hosking)
4. Christine Müller. *Active Mathematical Documents*, University of Auckland, NZ, 2008–9. (PhD internship)
5. Bruno Grenet. *Complexity and Incompleteness*, University of Auckland, NZ, 2008. (MSc internship)
6. Nicholas Hay (nickjhay@gmail.com). *Optimal Agents*, University of Auckland, NZ, 2005.
7. Mike Stay. *Uncertainty, Incompleteness and Randomness*, 2004, University of Auckland, NZ.
8. Dominik Schultes. *Rainbow Sort*, University of Auckland, NZ, 2004.
9. Pulkit Grover. *Transcending the Turing Barrier via Quantum Computing*, University of Auckland, NZ, 2003 (with H. Carmichael and B. Pavlov) (internship)
10. Igor Kurlatov. *Simulating the EPR Effect*, University of Auckland, NZ, 2003.
11. Jim Yaghi. *A User Friendly Version of Chaitin’s UTM-lisp*, University of Auckland, NZ, 2001. (co-supervised with R. Nicolescu)
12. Terry Chiu. *An Infrastructure for Testing Computational Complementarity Using Java Aglets*, University of Auckland, NZ, 1998. (co-supervised with E. Calude and R. Nicolescu)
13. Gerard P. Atkinson. *Information-Theoretic Incompleteness*, University of Auckland, NZ, 1997–8.
14. Gordon Alford. *Modelling DNA Computation*, University of Auckland, NZ, 1996.
15. Gabriel Istrate (gabriel.istrate@gmail.com). *Topological Methods in Recursive Function Theory*, University of Bucharest, Romania, 1988–1992. He got a Ph.D. degree from the University of Rochester, USA. Started his career at Los Alamos National Laboratory, USA. Presently researcher at the E-Austria Research Institute, Timișoara, Romania.
16. Gabriel Ciobanu. *Programming Logic*, University of Bucharest, Romania, 1988–1991. He has got a Ph.D. degree from the University “Alex.I.Cuza”, Iași, Romania, 1990 where he is a professor of computer science.

17. Lila Kari (Sântean) (lila@csd.uwo.ca). *Hierarchies of Primitive Recursive String-Functions*, University of Bucharest, Romania, 1985–1987. She has got a Ph.D. degree from Turku University, Finland, 1991 and is currently professor of computer science at the University of Western Ontario, London, Canada.
18. Daniel Naie (Daniel.Naie@univ-angers.fr). *Equations on Free Monoids*, University of Bucharest, Romania, 1985–86. He has got a Ph.D. degree from the University Paris XI, Orsay, France, 1994 and is currently professor of mathematics at the Université d’Angers, France.
19. Viorel Vâjăitu (vvajaitu@stoilow.imar.ro). *Exotic Numeration Systems*, University of Bucharest, Romania, 1981–82. He has got a Ph.D. degree from the Institute of Mathematics, Romanian Academy where he has currently a senior research position.
20. Victor Vianu (vianu@cs.ucsd.edu). *Metrics on Free Monoids*, University of Bucharest, Romania, 1975–76. He received his Ph.D. from the University of California, San Diego, where he is currently professor of computer science.

6.7 Teaching Impact

Consistently scoring an average greater than 8.5 (on the scale 1–10) in student teaching evaluations. Various textbooks and expository papers are used as support for courses in many universities around the world, e.g., Stanford University (USA), University of Chicago (USA), UCLA (USA), National Defense University (USA), Universidad De Granada (Spain), University of Ulm (Germany), Martin-Luther-Universität Halle-Wittenberg (Germany), Asian Institute of Technology (Thailand), University of Western Ontario (Canada), Siena University (Italy), Technical University of Vienna (Austria), Bucharest University (Romania).

7 Service and Administration

7.1 Selected Committee Work¹³

1. Chair, Best Student Paper Committee, Department of Computer Science, 2012.
2. Member, Distinguished Visitor Awards, UARC, University of Auckland, 2012.
3. *Member Research Committee, University of Auckland, 2012-2014.*
4. Member, DSAC, Department of Computer Science, 2011.
5. Member of the UoA PBRF Mathematical and Information Sciences and Technology (MIST) panel, Faculty of Science, 2011–2012.
6. Member, National Informatics Committee, Bucharest, Romania, 2011–2012..
7. PhD Coordinator, 2010–2011.
8. *Member, Academia Europaea Informatics Section Informatics Education Committee, 2009–2011.*
9. APR interviewer for Theory Group sub-professorial members, 2008–2009.
10. DSAC referee for two SL6 (over the bar) applications, Department of Computer Science, 2007.
11. Member, FoS Research Committee, University of Auckland, NZ, November 2005 to July 2006.
12. Deputy Head of Department Research, Department of Computer Science, August 2005 to July 2006.
13. PhD Coordinator and Chair of the Graduate Committee, Department of Computer Science, January 2004 – June 2010.

¹³Current positions are emphasised.

14. Member, Academic Committee, Department of Computer Science, 2004–5, 2007.
15. External assessor for the quality of the EPs in the Departments of Mathematics and Statistics, University of Auckland, May–June 2003.
16. Member, Research Committee, Department of Computer Science, January 2003 – August 2009.
17. Member, Committee for a Chair in Applied Computer Science, University of Auckland, 2000–2001.
18. Member, Department Advisory Staffing Committee, Department of Computer Science, 1998–2001, 2004.
19. Chair, Graduate Student Support Committee, Department of Computer Science, from August 1994 to December 1996.
20. *Member, University of Auckland Senate, University of Auckland, NZ, from April 1994 on.*
21. Member, Hyper-Media Unit, from January 1994 to December 1995.
22. Member, Pure Mathematics Committee, School of Mathematical & Information Sciences, from May 1993 to December 1999.
23. Member, Standing Committee on Informatics, Board of Studies in Mathematical & Information Sciences, University of Auckland, from August 1993 December 1999.
24. Chair, Working Group on Theoretical Computer Science, University of Auckland, Auckland, from April 1993 to December 1995.
25. Dean, Faculty of Mathematics, Hyperion University, Bucharest, Romania, from October 1991 to October 1992.
26. Member, Appointment and Promotion Committee, Bucharest University, Romania, from September 1990 to September 1992.
27. Member, Committee on Mathematics Education, Bucharest University, Romania, from September 1990 to September 1992.
28. *Member, Computer Science Ph.D. Committee, Bucharest University, Romania, from April 1990 on.*
29. Member, Library Committee, Faculty of Mathematics, Bucharest University, Romania, from September 1988 to November 1990.
30. Member, Graduation Executive Committee, Bucharest University, Romania, from September 1981 to September 1990.
31. Head of the Computer Science Department, School for Computer Science, Bucharest, Romania, from January 1978 to October 1978.

7.2 Editorial Activity

1. Member of the Advisory Board, *European Association for Theoretical Computer Science* Book Series, Springer-Verlag, Heidelberg, (from 2004 on).
2. Book series editor, *Discrete Mathematics and Theoretical Computer Science* Book Series, Springer-Verlag, London (from 1996 to 2004).
3. Member of the Editorial Advisory Board of the book series *Advances in Languages Studies*, Polimetrica, Milan, (from 2005 to 2006).
4. Founding editor-in-chief, *Journal of Universal Computer Science*, Springer-Verlag (from 1994 to 2009); member of the Editorial Board (from 2009 on).

5. Member of the Editorial Board of the following journals: *Analele Universității București, Matematică–Informatică* (from 1988 to 2006), *Bulletin of the European Association of Theoretical Computer Science* (from 1993 on), *Grammars* (from 1997 to 2003), *Fundamenta Informaticae* (from 1997 on), *Romanian Journal of Information Science and Technology* (from 1998 on), *Natural Computing Journal*, *Contributions to Discrete Mathematics* (from 2005 on), *International Journal of Foundations of Computer Science*, *Mathematics Applied in Science and Technology* (from 2006 on), *unoMolti*, *Modi della Filosofia*, *Revista de Filosofie Analitica* (from 2007 on), *The Open Software Engineering Journal* (from 2008 on), *Theoretical Computer Science*, *International Journal of Nanotechnology and Molecular Computation* (from 2009 on), *Mathematical Structures in Computer Science*, *International Journal of Unconventional Computing* (from 2010 on), *International Journal of Modern Nonlinear Theory and Application* (from 2012 on).
6. Associate–editor, G. Rozenberg, A. Salomaa (eds.). *Handbook of Formal Languages*, Vol. I–II, Springer-Verlag, Berlin, 1997.
7. Member of the Advisory Board, G. Rozenberg, T. Bäck, J. N. Kok. *Handbook of Natural Computing: Theory, Experiments, and Applications*, Springer, Berlin, 2012.

7.3 Webmaster

1. *Academia Europaea Informatics Section*, 2008–2010.
2. *Developments in Language Theory*, 2005–2011.
3. International Conference Series “*Unconventional Computation*”, 2002–2011.
4. International Conference Series “*Unconventional Computation and Natural Computation*”, 2011 on.

7.4 Conferences and Workshops

7.4.1 Steering Committee

1. Member, *International Steering Committee of the International Workshop on Natural Computing*, 2009 on.
2. Co-chair, *Physics and Computation*, 2008–2012; member since 2012.
3. Member, *Developments in Language Theory*, 2005 on.
4. Co-chair, *International Conference Series “Unconventional Computation”*, 1998–2010; Founding chair, from 2011 on.

7.4.2 Programme Committee

1. *History And Philosophy of Computing*, Paris, November 2013.
2. *International Conference On “Role of Technology in Enhancing The Quality of Higher Education”*, Kanya Maha Vidyalaya, Jalandhar, India, October 2012.
3. *11th International Conference Unconventional Computation & Natural Computation*, September 2012, Orléans, France.
4. *Interdisciplinary Symposium on Complex Systems*, September 2012, Kos Island, Greece.
5. *Workshop on Reachability Problems 2012*, Bordeaux, France, September 2012.
6. *Turing Centenary Workshop on The Incomputable*, June 2012, London, UK.
7. *9th Annual Conference on Theory and Applications of Models of Computation, TAMC 2012*, May 2012, Beijing, China.

8. *Workshop on Physics and Computation 2011*, June 2011, Turku, Finland.
9. *Workshop on HyperNet 2011*, June 2011, Turku, Finland.
10. *The Seventh Congress of Romanian Mathematicians*, June-July 2011, Braşov, Romania.
11. *Interdisciplinary Symposium on Complex Systems*, September 2011, Halkidiki, Greece.
12. *Workshop on Reachability Problems 2011*, Genova, Italy, September 2011.
13. *8th Annual Conference on Theory and Applications of Models of Computation*, Tokyo, Japan, 2011.
14. *Annual International Conference on Information Theory and Application*, February 2011, Cebu Philippines.
15. *13th CATS 2011 Computing: The Australasian Theory Symposium*, Perth, Australia, January 2011.
16. *Workshop on Reachability Problems 2010*, Brno, Czech Republic, October 2010.
17. *Theoretical Computer Science, World Computer Congress*, Brisbane, Australia, September 2010. (Chair Track A)
18. *Workshop on Physics and Computation 2010*, Luxor-Aswan, Egypt, September 2010.
19. *Workshop on Hypercomputation 2010*, Tokyo, Japan, June 2010.
20. *9th International Conference on Unconventional Computation*, Tokyo, Japan, June 2010.
21. *14th Developments in Language Theory (DLT'10)*, London, Ontario, Canada, August 2010.
22. *Infinite and Infinitesimal in Mathematics, Computing and Natural Sciences*, Cetraro, Italy, May 2010.
23. *Advances in the Theory of Computing*, Timișoara, Romania, September 2009.
24. *8th International Conference on Unconventional Computation*, Azores, Portugal, September 2009.
25. *International Conference on Theory and Applications in Mathematics and Informatics*, Alba Iulia, Romania, September 2009.
26. *Workshop Just One Universal Algorithm 2009*, Pisa, Italy, July 2009.
27. *14th International Conference on Implementation and Application of Automata* Sydney, Australia, July 2009.
28. *4th International Computer Science Symposium in Russia*, Novosibirsk, Russia, August 2009.
29. *3rd International Workshop on Reachability Problems in Computational Models*, Paris, France, September 2009.
30. *6th Annual Conference on Theory and Applications of Models of Computation 2009*, ChangSha, China, May 2009.
31. Member of the Advisory Committee of the *International Symposium on Information Theory and its Applications (ISITA 2008)*, Auckland, New Zealand, December 2008.
32. *2nd International Workshop on Reachability Problems in Computational Models*, Liverpool, UK, September 2008.
33. *13th International Conference on Implementation and Application of Automata (CIAA'08)*, San Francisco, USA, July 2008.
34. *5th Annual Conference on Theory and Applications of Models of Computation (TAMC08)*, Xi'an, China, April 2008.

35. *5th Symposium on Foundations of Info and Knowledge Systems (FoIKS 2008)*, Pisa, Italy, February 2008.
36. *14th CATS 2008 Computing: The Australasian Theory Symposium*, Wollongong, Australia, January 2008.
37. *3rd South-East European Workshop on Formal Methods (SEEFM'07)*, Thessaloniki, Greece, November-December 2007.
38. *6th Congress of Romanian Mathematicians*, Bucharest, Romania, July 2007.
39. *9th International Workshop on Descriptive Complexity of Formal Systems (DCFS'07)*, High Tatras, Slovakia, July 2007.
40. *12th International Conference on Implementation and Application of Automata (CIAA'07)*, Prague, Czech Republic, July 2007.
41. *11th Developments in Language Theory (DLT'07)*, Turku, Finland, July 2007.
42. *11th International Conference on Algebraic Methodology and Software Technology (AMAST'06)*, Kuressaare, Estonia, July 2006.
43. *11th International Conference on Implementation and Application of Automata (CIAA'06)*, Taipei, Taiwan, August 2006.
44. *International School and Conference on Combinatorics, Automata and Number Theory (CANT'06)*, University of Liège, Belgium, May 2006.
45. *Descriptive Complexity of Formal Systems (DCFS'06)*, Las Cruces, New Mexico, USA, June 2006.
46. *Third International Colloquium on Theoretical Aspects of Computing (ICTAC06)*, Gammarth/Tunis, Tunisia, November, 2006.
47. *Tenth International Conference on Developments in Language Theory (DLT'06)*, Santa Barbara, USA, June 2006.
48. *Theory and Applications of Models of Computation (TAMC 2006)*, Beijing, China, 2006, May 15–20.
49. *2nd South-Eastern European Workshop on Formal Methods (SEEFM'05)*, Ohrid, Macedonia, November 2005.
50. *Conference on Algebraic Informatics (CAI'05)*, Thessaloniki, Greece, October, 2005.
51. *Second International Colloquium on Theoretical Aspects of Computing (ICTAC05)*, Hanoi, Vietnam, 17–21 October, 2005.
52. *ITW2005–IEEE ITSOC Information Theory Workshop 2005 on Coding and Complexity*, Rotorua, NZ, August 29–September 1, 2005.
53. *Ninth International Conference on Developments in Language Theory (DLT'05)*, Palermo, Italy, July 2005.
54. *The 7th workshop “Descriptive Complexity of Formal Systems” (DCFS'05)*, Como, Italy, June 30–July 2, 2005.
55. *Quantum Physics and Communication, (QPC 2005)*, Dubna, Russia, 30 June–3 July, 2005.
56. *Reversible Computing*, ACM Computing Frontiers 2005 (CF05) Ischia, Italy, May 4–7, 2005.
57. *Computational Aspects and Modeling of Complex Systems* Valparaiso, Chile, January 3–21, 2005.
58. *Eighth International Conference on Developments in Language Theory (DLT'04)*, Massey University at Albany, Auckland, NZ, December 2004. (Chair)

59. *The 10th International Conference on Algebraic Methodology And Software Technology (AMAST 2004)*, Stirling, Scotland, UK, July 2004.
60. *Descriptive Complexity of Formal Systems (DCFS'04)*, London, Ontario, Canada, August 2004.
61. *First International Colloquium on Theoretical Aspects of Computing (ICTAC 2004)*, Guiyang, China, September 2004.
62. *10th Journées Montoises d'Informatique Théorique*, Université de Liège, Belgium, September 2004.
63. *The 1st South-East European Workshop in Formal Methods*, Thessaloniki, Greece, November 2003.
64. *Descriptive Complexity of Formal Systems (DCFS'03)* Budapest, Hungary, July 2003.
65. *Developments in Language Theory (DLT'02)*, Kyoto, Japan, September 2002.
66. *Descriptive Complexity of Formal Systems (DCFS'02)*, London, Ontario, Canada, August 2002.
67. *Quantum Computation and Learning*, Riga, Latvia, May 2002.
68. *The Fourth Conference of Systemics, Cybernetics and Informatics (SCI2001)*, Orlando, Florida, USA, July, 2001.
69. *Workshop on Membrane Computing (WMC-CdeA 2001)*, Curtea de Argeş, Romania, August 2001.
70. *Third International Conference Discrete Mathematics and Theoretical Computer Science (DMTCS'01)*, Constanţa, Romania, July 2001.
71. *The 14th International Symposium on Foundations of Computation Theory (FCT'2001)*, Riga, Latvia, August 2001.
72. *Workshop on Descriptive Complexity of Automata, Grammars and Related Structures (DCA-GRS 2001)*, Vienna, Austria, July 2001.
73. *The Second International Conference UMC'2K, Unconventional Models of Computation*, Solvay Institutes, Free University of Brussels, Belgium, December 2000. (Co-chair)
74. *The Fourth Conference of Systemics, Cybernetics and Informatics (SCI2000)*, Orlando, Florida, USA, July, 2000.
75. *Workshop on Descriptive Complexity of Automata, Grammars and Related Structures (DCA-GRS 2000)*, London, Ontario, Canada, July, 2000.
76. *First Conference on Theoretical Computer Science and Informatics Technologies*, Eforie, Romania, May, 2000.
77. *The 8-th International Conference on Algebraic Methodology And Software Technology (AMAST'2000)*, Iowa City, USA, May, 2000.
78. *Third International Colloquium on Words, Languages and Combinatorics*, Kyoto, Japan, March, 2000.
79. *Workshop on Constructivity, Complexity and Fuzzyness (CCF'99)*, Galaţi, Romania, August, 1999.
80. *The 12th International Symposium on Foundations of Computation Theory (FCT'99)*, Iaşi, Romania, August–September, 1999.
81. *Molecular Computing*, A Satellite Workshop to MFCS'98, Brno, Czech Republic, August, 1998.

82. *Randomized Algorithms*, A Satellite Workshop to *MFCS'98*, Brno, Czech Republic, August, 1998.
83. *Computing: the Australian Theory Seminar (CATS'98)*, Perth, Australia, January, 1998.
84. *Romanian Internet Learning Workshop ("Internet as a Vehicle for Teaching")*, Ilieni, Romania, June 1997.
85. *Twentieth Australasian Computer Science Conference (ACSC'97)*, Sydney, Australia, February, 1997.
86. *Computing: the Australian Theory Seminar (CATS'97)*, Sydney, Australia, January, 1997.
87. International Conference *Discrete Mathematics and Theoretical Computer Science (DMTCS'96)*, Auckland, NZ, December, 1996.
88. Summer School "*Chaitin Complexity and Applications*", Black Sea University, Mangalia, Romania, July 1995.
89. The *22nd International Colloquium on Automata, Languages, and Programming (ICALP'95)*, Szeged, Hungary, July 1995.
90. Symposium *Salodays in Auckland*, The University of Auckland, Auckland, NZ, February, 1994.
91. The *9th Romanian Symposium on Computer Science'93 (ROSYCS'93)*, Iași, Romania, 1993.
92. *National Colloquium Info-Iași*, Iași, Romania, 1983, 1985, 1987, 1989.

7.4.3 Organising Committee

1. *Workshop on Physics and Computation 2011*, Turku, Finland, June 2010.
2. *Workshop on Hypercomputation 2011*, Turku, Finland, June 2010.
3. Seventh Congress of Romanian Mathematicians Brasov, Romania, June 29–July 5, 2011.
4. *Workshop on Physics and Computation 2010*, Luxor-Aswan, Egypt, September 2010.
5. Co-organised with Barry Cooper the special session "Computability of the Physical" (speakers: S. Lloyd, Y. I. Manin, C. Moore, D. Wolpert), *CiE 2010*, Ponta Delgada, Portugal, June 2010.
6. *Grand Challenges of Unconventional Computation*, A Workshop of the Academia Europaea Informatics Section, Liverpool University, September 2008.
7. *Workshop on Physics and Computation*, Technical University of Vienna, August 2008.
8. *Computability and Complexity*, CDMTCS, Auckland, December 2007.
9. *Special Session: Mathematical Truth and Provability in the 21st Century*, 6-th Congress of Romanian Mathematicians, Bucharest, Romania, July 2007.
10. *Eighth International Conference on Developments in Language Theory (DLT'04)*, Massey University at Albany, Auckland, NZ, December 2004.
11. *Applications in Computer Science Session*, of the *17th Summer Topology Conference*, Auckland University, NZ, July 2002.
12. *Workshop on Truths and Proofs*, Auckland University, Auckland, NZ, December 2001.
13. The Second International Conference *UMC'98, Unconventional Models of Computation*, Solvay Institutes, Free University of Brussels, Belgium, December 2000. (Co-chair)
14. *Workshop on Multiset Processing (WMC'2000)*, Curtea de Argeș, Romania, August 2000.
15. *The 5th Anniversary Workshop on Discrete Mathematics and Theoretical Computer Science*, Auckland University, May 2000.

16. *Workshop on Constructivity, Complexity and Fuzzyness (CCF'99)*, Galați, Romania, August, 1999.
17. *DMTCS'99-CATS'99*, University of Auckland, Auckland, NZ, January, 1999. (Chair)
18. The Second Japan–NZ Workshop on *Logic In Computer Science*, University of Auckland, Auckland, NZ, October, 1998. (Co-chair)
19. The First International Conference *UMC'98, Unconventional Models of Computation*, University of Auckland, Auckland, NZ, January, 1998. (Chair)
20. The First Japan–NZ Workshop on *Logic In Computer Science*, University of Auckland, Auckland, NZ, August, 1997. (Co-chair)
21. International Conference *DMTCS'96, Discrete Mathematics and Theoretical Computer Science*, Auckland, NZ, December, 1996. (Co-chair)
22. Summer School “*Chaitin Complexity and Applications*”, Black Sea University, Mangalia, July, 1995. (Chair)
23. Symposium *Salodays in Auckland*, University of Auckland, Auckland, NZ, February, 1994. (Chair)
24. Conference *Does God Play Dice ?*, University of Auckland, Auckland, NZ, February, 1993. (Chair)
25. Symposium *SALODAYS in Theoretical Computer Science*, Bucharest University, Bucharest, Romania, June, 1992. (Co-chair)
26. Workshop *There Are Only 3000 Days Before the Year 2000*, Romanian Academy, Bucharest, Romania, 1991. (Co-chair)
27. Workshop on *Mathematics and Computer Science Education for the 21th Century*, Romanian Academy and CEPES–UNESCO, Bucharest, Romania, 1990. (Co-chair)
28. Workshop *How to Cope with Complexity*, Romanian Academy, Bucharest, Romania, 1988. (Chair)
29. Symposium on *Mathematics and Computer Science dedicated to the 60th Birthday Anniversary of Professor Solomon Marcus*, Bucharest University, Bucharest, Romania, March, 1985.
30. Symposium on *Human Needs (Project GPID)*, UNU, Tokyo and CEPES–UNESCO, Bucharest, Romania, 1980.

7.5 External Evaluator

7.5.1 Official Nominator

1. Nominator for the “Kyoto Prize“, [The Inamori Foundation](#), Kyoto, Japan, 2004, 2012.
2. Official Nominator for the “Japan Prize“, [The Japan Prize Foundation](#), 2013–2016.

7.5.2 Referee for Journal and Conferences

1. Referee for the journals: *Revue Roumaine de Mathématiques Pures et Appliquées*, *Bulletin Mathématique de la Société Mathématique de Roumanie*, *Studii și Cercetări Matematice*, *Kybernetika*, *Theoretical Computer Science*, *Notre Dame Journal of Formal Logic*, *Complexity*, *Theory of Computing Systems*, *Soochow Journal of Mathematics*, *Trends in Biotechnology*, *Journal of Symbolic Logic*, *Discrete Applied Mathematics*, *Journal of Logic, Language and Information*, *SIAM Journal on Computing*, *Journal of Automata, Languages and Combinatorics*, *Journal of Philosophical Logic*, *International Journal of Foundations of Computer Science*, *Complexity*, *Mathematical Logic Quarterly*, *Logic Journal of the Interest Group in Pure and Applied Logics (IGPL)*, *Computer and Systems Sciences*, *Advances in Mathematics*, *Applied*

Mathematics E-Notes, Journal of ACM, Journal of Natural Computing, Applied Numerical Mathematics, Central European Journal of Mathematics, Information Sciences, Theoretical Computer Science: Theory of Natural Computing, Multiple Valued Logic and Soft Computing Journal, Journal of Complexity, London Mathematical Society, Journal of Numerical Analysis, Industrial and Applied Mathematics, Journal of Computer and System Sciences, Proceedings of the Royal Society A: Mathematical, Physical and Engineering Sciences, IEEE Transactions on Nanobioscience, Int. J. of Parallel, Emergent and Distributed Systems, International Journal of Computer Mathematics, Acta Informatica, Information and Computation, Information Processing Letters, International Journal of Quantum Information, IEEE Transactions on Computers, Advances in Complex Systems, Nature, Foundations of Physics, The European Physical Journal B, Romanian Journal of Information Science and Technology, Information Sciences, Comm. ACM, Theory of Computing Systems, ACM Transactions on Computational Logic, The Computer Journal, Philosophical Transactions of the Royal Society, Comptes rendu Mathématique, Asia Pacific Math Newsletter, Numerical Algorithms, Computer Physics Communications, Glottometrics, Applied Mathematics Letters, Journal of Complexity, Physica A.

2. Referee for the Proceedings of the conference *Horizons of Truth – Gödel Centenary*, Cambridge University Press, New York, 2007.
3. Referee for *2013 IEEE Information Theory Workshop*, Seville, Spain, 2013, *The Second Russian-Finnish Symposium in Discrete*, Turku, Finland, 2012, *International Symposium on Information Theory ISIT2010*, Austin, USA, *2009 Information Theory Workshop*, Taormina, Italy, *35th International Colloquium on Automata, Languages and Programming (ICALP'08)*, Reykjavik, Iceland, *International Symposium on Information Theory (ISIT2008)*, Toronto, Canada, *Computability in Europe (CiE2007)*, Siena, Italy, 2007, *15th International Symposium Fundamentals of Computation Theory (FCT'05)*, Lübeck, Germany, 2005, *32nd International Colloquium on Automata, Languages and Programming (ICALP'05)*, Lisboa, Portugal, 2005, *Tenth International Workshop on Combinatorial Image Analysis (IWCIA 04)*, Auckland, NZ, 2004, *Real Numbers and Computers (RNC6)*, Dagstuhl, Germany, 2004, *CIAA 2004*, Kingston, Ontario, Canada, 2004, *RNC'5*, Lyon, France, 2003, *FOCS'02*, Vancouver, Canada, 2002, *STACS'2002*, Antibes Juan-les-Pins, France, 2002, *FCT'2001*, Riga, Latvia, 2001, *MFCS'2001*, Mariánské Lázně, Czech Republic, 2001, *STACS'2001 (Annual Symposium on Theoretical Aspects of Computer Science)*, Dresden, Germany, 2001, *MFCS'2000 (Mathematical Foundations of Computer Science)*, Bratislava, Slovakia, 2000, *DLT'99 (Developments in Language Theory)*, Aachen, Germany, 1999, *1999 IEEE Conference on Computational Complexity*, USA, 1999, *FCT'97 (Fundamentals of Computation Theory)*, Krakow, Poland, 1997, *AFL'96 (8th Conference on Automata and Formal Languages)*, Salgotarjan, Hungary, 1996, *CATS'96 (Computing: the Australian Theory Seminar)*, October, Melbourne, Australia, 1995, *COCOON 2004 (Tenth International Computing and Combinatorics Conference)*, Jeju Island, Korea, 2004.

7.5.3 Referee for Granting Agencies

Expert evaluator “Latvian Science Council”, 2012. Referee for the “Turing Centenary Research Fellowship”, 2012. Elected EU expert evaluator for FP7-ICT-2011-8-ICT Information and Communication Technologies, Objective 9.6 “Unconventional Computation”, Brussels, 2011–13. Referee, *The University System of Maryland Regent’s Award for Scholarship*, USA, September 2011, *South Africa’s National Research Foundation (NRF)*, June 2010, *ESF Standing Committee for Physical and Engineering Sciences (PESC)*, *European Science Foundation 2010–2012*, *The Research Promotion Foundation (RPF) of Cyprus*, Programme “DIDAKTOR”, European Union’s (EU) Structural Funds (SF), Cyprus, November 2009, *South Africa’s National Research Foundation (NRF)*, June 2009, *Science and Engineering Research Council, Singapore*, March 2009, *Romanian National University Research Council*, October 2008, *South Africa’s National Research Foundation (NRF)*, June 2007, *European Science Foundation Standing Committee for Physical and Engineering Sciences*, July 2006, *NEST*, “Tackling Complexity in Science”, *Sixth Framework Programme*, March 2006, *Friedrich Wilhelm Bessel Research Award of the Alexander von Humboldt Foundation*, March 2006, *Swiss National Science Foundation (FNSNF)*, December 2004, *South Africa’s National Research Foundation (NRF)*, September 2004, *ESF Standing Committee for Physical and Engineering Sci-*

ences (*PESC*), *European Science Foundation*, December 2003, *The Council of Physical Sciences of the Netherlands Organization for Scientific Research (NWO)*, April 2003, *Natural Sciences and Engineering Research Council of Canada*, December, 1998, *Grant Agency*, Academy of Sciences of the Czech Republic, Praha, Czech Republic, July 1998, *Public Good Science Fund*, Foundation for Research and Technology, Wellington, NZ, January 1998. Member, *Marsden Fund Selection Panel*, Foundation for Research and Technology, Wellington, NZ, July 1995, *Science Foundation Ireland*, Dublin, May 2009.

7.5.4 Referee for Publishing Companies

Referee for the publishing houses *Academiei*, and *Științifică*, (Romania), *Springer-Verlag* (Heidelberg), *Springer-Verlag* (New York), *Springer-Verlag* (London), *World Scientific* (Singapore), *Oxford University Press* (Oxford), *Bentham Science Publishers* (Oak Park).

7.5.5 Referee for Universities/Academies

1. Referee for the recruitment of a researcher at the University of Sheffield, UK, 2011.
2. Referee for the recruitment of a Full Professor at the École Polytechnique, Paris, 2010.
3. Referee for the election of Fellows at the Academy of Sciences of the Developing World, Trieste, Italy, 2009.
4. Referee for the Appointment of a Docent in Mathematics, University of Turku, Finland, 2008.
5. Referee for the Appointment of a Full Professor in the Department of Computer Science & Engineering of the Hong Kong University of Science and Technology, Hong Kong, 2007.
6. Referee for the Appointments Committee, Computer Science Department, Holon Academic Institute of Technology, Holon, Israel, May 2005.
7. Referee for the Committee for Advancement to Professor Above Scale, Department of Computer Science and Engineering, University of California, San Diego, USA, January 2005.
8. Member of the *Appointment Committees for Chairs in Computer Science*, Bucharest University, Romania, June–July 2001, Auckland University, February–May 2001.
9. Referee for the *Appointment Committees*, Applied Science University, Amman, Jordan, November 2001, University of Canterbury, NZ, October 1997, May 1996, *Standing Committee of Senate*, University of Manchester, United Kingdom, August, 1995 and *Collegiate Personnel Committee*, University of Massachusetts, Boston, Ma., USA, May 1995.

7.5.6 Other

1. Member “Romanian National Board for Certification of Degrees, Diplomas and Certificates”, Ministry of Education, Youth and Sports, Romania, 2011–2012.
2. Invited reviewer for Thomson Reuters and Times Higher Education “Academic Reputation Survey”, 2010–2013.
3. Invited reviewer for “Times Higher - QS World University Rankings”, 2007–2013.
4. Reviewer for the section *Algebra, Logic & Foundations* of the Report *NZ Knowledge Base Profiles: The Mathematical Sciences*, The Royal Society of NZ, 1997.
5. Reviewer for *Mathematical Reviews* (from 1976 on), *Zentralblatt für Mathematik* (from 1979 on), *Computing Reviews* (from 1983 on).
6. Referee for the publishing houses *Academiei*, and *Științifică*, (Romania), *Springer-Verlag* (Heidelberg), *Springer-Verlag* (New York), *Springer-Verlag* (London), *World Scientific* (Singapore), *Oxford University Press* (Oxford).

7.6 Reader of Ph.D., Master, Project Theses

1. Independent Chair for the PhD oral examination of Neel Pandey, Auckland University, 2013.
2. Independent Chair for the PhD oral examination of Gareth Shaw, Auckland University, 2012.
3. Hector Zenil, *Une Approche Expérimentale à la Théorie Algorithmique de la Complexité*, University Lille 1, France, 2011 (Ph.D. Thesis).
4. Ewan Orr. *Evolving Turing's Artificial Networks*, University of Canterbury, Christchurch, NZ, 2010 (Ph.D. Thesis).
5. Christine Müller. *daptation of Mathematical Documents*, Jacobs University Bremen, Germany, 2010 (Ph.D. Thesis).
6. Matthew Hendtlass. *Aspects of Constructive Dynamical Systems*, University of Canterbury, Christchurch, NZ, 2009 (Masters Thesis).
7. Independent Chair for the Ph.D. oral examination of Roopak Sinha, Auckland University, 2008.
8. Cristóbal Rojas González. *Aléatoire et théorie ergodique: un point de vue algorithmique*, École Normale Polytechnique, Paris, France, 2008 (Ph.D. Thesis).
9. Michael Brough. *Sequential Automatic Algebras*, University of Auckland, 2008 (Masters Thesis).
10. Matthew Hendtlass. *Measure and Integration*, Canterbury University, NZ, 2008 (Project Thesis).
11. Aleksandar Stojmirović. *Quasi-Metrics, Similarities and Searches: Aspects of Geometry of Protein Datasets*, Victoria University of Wellington, NZ, 2005 (Ph.D. Thesis).
12. Jack Stecher. *Business Language and Asymmetric Perceptions*, University of Minnesota, USA, 2005 (Ph.D. Thesis).
13. Independent Chair for the Ph.D. oral examination of Jeffrey Gong, Auckland University, 2005.
14. H. Diener. *Apartness Spaces*, Canterbury University, NZ, 2004 (Honours Thesis).
15. Adriana Popovici, *n-Dimensional Cellular Automata: Applications and Generalizations*, University of Timișoara, Romania, 2003 (Ph.D. Thesis).
16. Douglas Campbell. *Induction Machines and the Mind*, Canterbury University, NZ, 2001 (Masters Thesis).
17. Robin Havea. *Constructive Spectral and Numerical Range Theory*, Canterbury University, NZ, 2001 (Ph.D. Thesis).
18. Independent Chair for the Ph.D. oral examination of Mark Stuart, Auckland University, 2000.
19. Robert Doron Reisz. *Stochastic Automata on Infinite Words*, University of Timișoara, Romania, 2000 (Ph.D. Thesis).
20. Lynda E. Robbins. *Modelling Cryptographic Systems*, University of Western Ontario, London, Canada, 1998 (Ph.D. Thesis).
21. Kahn Mason. *Notes on the Parallel Decomposition Theory for Finite State Machines*, Canterbury University, NZ, 1998 (Masters Thesis).
22. John Pearson. *Heuristic Search in Route Finding*, University of Auckland, NZ, 1998 (Masters Thesis).
23. Robin Siale Havea. *Constructive Operator Theory on Hilbert Space*, Waikato University, Hamilton, NZ, 1998 (Masters Thesis).

24. Yuchuan Wang. *Constructive Theory of Partial Differential Equations*, Waikato University, Hamilton, NZ, 1996 (Ph.D. Thesis).
25. Robert Blandford. *Type Algebra*, University of Auckland, NZ, 1996 (Masters Thesis).
26. Hacı-Cristian Kevorchian. *Reasoning by Analogy and Applications to Automated Theorem-Proving*, Bucharest University, Romania, 1995 (Ph.D. Thesis).
27. Klaus-Hilmar Sprenger. *Hierarchies of Primitive Recursive Functions on Term Algebras*, Universität–GH–Siegen, Germany, 1995 (Ph.D. Thesis).
28. Rodica Ceterchi. *Topology, Categories, Learning*, Bucharest University, Romania, 1992 (Ph.D. Thesis).

7.7 Professional Societies

1. *American Mathematical Society*, from 1976 on.
2. *Romanian Mathematical Society*, from 1976 to 1990.
3. *European Association for Theoretical Computer Science*, from 1983 on. (Council member, 1995–2003)
4. *NZ Computer Science Society*, from 1993 to 1995.
5. *NZ Mathematical Society*, from 1993 on.
6. *European Association for Computer Science Logic*, from 1994 on.
7. *Kurt Gödel Society*, from 1996 on.
8. *European Mathematical Society*, from 1997 on.
9. *The Royal Society of NZ*, from 1997 to 2010.
10. *IFIP TC1 – Foundations of Computer Science, WG 1.2 – Descriptive Complexity*, from 1999 on.
11. *Association Computability in Europe*, from 2008.
12. *New York Academy of Sciences*, 1994–1996.

8 Awards and Distinction

1. *International Workshop on Theoretical Computer Science*, Dedicated to Prof. Cristian S. Calude's 60th Birthday, Auckland 2012, <http://www.cs.auckland.ac.nz/research/conferences/wtcs2012/>.
2. *Member of the Informatics Section Committee*, Academia Europaea, 2010–2012.
3. Visiting Fellow, London Mathematical Society (scheme two grants), 2010.
4. *Hood Fellow*, 2008–2009.
5. *Member of Academia Europaea*, 2008 on.
6. *Dean's Award for Excellence in Teaching*, Faculty of Science, University of Auckland, 2007.
7. *Award for Excellence in Research*, University of Bucharest, Romania, 2007.
8. *Member of the International Board*, Valparaiso Institute of Complex Systems, Valparaiso, Chile, 2005.
9. Quality Category A in the PBRF Performance Based Research Fund, 2003, 2006, 2012 assessments (New Zealand).

10. *Honorificum Membrum*, Black Sea University, Bucharest, Romania, December 2002.
11. “*C. S. Calude*” *Mathematics Regional Contest*, National College “Vasile Alecsandri”, Galați, Romania, from 2000 on.
12. Council, *European Association for Theoretical Computer Science*, 1995–2003.
13. *1994 NZ Computer Science Visiting Lecturer*.
14. “*Gheorghe Lazăr*” *Mathematical Prize*, Romanian Academy, Romania, 1988.
15. *Computing Reviews Award*, Association for Computing Machinery, New York, USA, 1986.
16. *Mathematical Student Prize*, Faculty of Mathematics, Bucharest University, Romania, 1975.
